Atomic Testing in Mississippi David Allen Burke, 2012-11-05 In *Atomic Testing in Mississippi* David Allen Burke illuminates the nearly forgotten history of America's only nuclear detonations east of the Mississippi River. The atomic tests conducted in the mid 1960s nearly 3,000 feet below ground in Mississippi's Tatum Salt Dome posed a potential risk for those living within 150 miles of the site which included residents of Hattiesburg, Jackson, Gulfport, Biloxi, Mobile, and New Orleans. While the detonations provided the United States with verification methods that helped limit the world's nuclear arsenals, they sparked widespread public concern. In 1964 and 1966 the Atomic Energy Commission conducted experiments at the salt dome code named Dribble surrounded by a greater population density than any other test site in the United States. Although the detonations were not weapons tests, they fostered a conflict between regional politicians interested in government-funded science projects and a population leery of nuclear testing near their homes. Even today residents near the salt dome are still fearful of long-term negative health consequences. Despite its controversy, Project Dribble provided the technology needed to detect and assess the performance of distant underground atomic explosions and thus verify international weapons treaty compliance. This technology led to advanced seismological systems that now provide tsunami warnings and detect atomic activity in other nuclear nations such as Pakistan and North Korea.

Chiefly translations from foreign aeronautical journals **Globalization of the Mass Media** États-Unis. National telecommunications and information administration, 1994 Discusses the why and how of globalization of the mass media; examines U.S. communications policy options that could enable U.S.-based mass media firms to better compete in international and domestic markets; explores the trend of expanding foreign direct investment and exports and looks at regulatory and technological changes affecting international competition. Makes recommendations for changes to enable greater participation by U.S. firms in foreign broadcasting markets **Misunderstanding Media** Brian Winston, 2016-10-04

The 1980s saw constant reports of an information revolution. This book, first published in 1986, challenges this view. It argues that the information revolution is an illusion, a rhetorical gambit, an expression of profound historical ignorance and a movement dedicated to purveying misunderstanding and disseminating disinformation. In this historically based attack on the information revolution, Professor Winston takes a hard look at the four central information technologies: telephones, television,

computers and satellites He describes how these technologies were created and diffused showing that instead of revolution we just have business as usual He formulates a law of the suppression of radical potential a law which states that new telecommunication technologies are introduced into society only insofar as their disruptive potential is contained Despite the so called information revolution the major institutions of society remain unchanged and most of us remain in total ignorance of the history of technology The Films of Robert Wise Richard C. Keenan,2007-08-22 From his early days as a film editor at RKO studios where he helped Orson Welles shape Citizen Kane to his success as a director and producer of musical blockbusters of the 1960s Robert Wise had a long and illustrious film career Unlike contemporaries such as Alfred Hitchcock John Ford or Howard Hawks however Wise s films lack any clearly discernible characteristics to signify his work There are few striking camera angles or visual flourishes that might distract from the primary obligation to present the story And like Hawks Wise never specialized in one or two genres but brought his directing skills to all manner of films His work as a director resists auteur categorization and that is a chief reason why some critics have been unduly negative in their consideration of his work In The Films of Robert Wise Richard Keenan examines the nearly forty features that represent the director s career from *Curse of the Cat People* in 1944 to *A Storm in Summer* 2001 the only television production Wise ever directed Keenan offers a reappraisal of Wise s films so that the true quality of his work can be better appreciated Keenan argues that if there was a flaw in Robert Wise as a director it was that he lacked the ego and temperament of the artist which was not necessarily a flaw at all Indeed Wise was a conscientious craftsman who saw his work not primarily as a vehicle for his own ideas and visual style but as an opportunity to present narrative that quite simply engages informs and entertains It was this perspective that helped produce a number of memorable films over the years including the gritty noir *Born to Kill* the one two punch of *The Set Up* and *Somebody Up There Likes Me* the sci fi prophecy *The Day the Earth Stood Still* and the gripping indictment of capital punishment *I Want to Live* classics all Wise also won a pair of Oscars for two of the most memorable not to mention successful musicals of all time *West Side Story* and *The Sound of Music* Drawing on more than 30 hours of interviews with Wise as well as additional interviews with a number of his collaborators Keenan offers a welcome reassessment of the director s work In his analysis of each film Keenan reveals both Wise the craftsman and the artist In doing so The Films of Robert Wise finally confers upon this underappreciated director the recognition he deserves

End Revue David Linton, 2021-07-31 London West End revue constituted a particular response to mounting social political and cultural insecurities over Britain's status and position at the beginning of the twentieth century Insecurities regarding Britain's colonial rule as exemplified in Ireland and elsewhere were compounded by growing demands for social reform across the country the call for women's emancipation the growth of the labour and the trade union movements all created a climate of mounting disillusion Revue correlated the immediacy of this uncertain world through a fragmented vocabulary of performance placing satire parody social commentary and critique at its core and found popularity in reflecting and responding to the variations of the new lived experiences Multidisciplinary in its creation and realisation revue incorporated dance music design theatre and film appropriating pre-modern theatre forms techniques and styles such as burlesque music hall pantomime minstrelsy and pierrot Experimenting with narrative and expressions of speech movement design and sound revue displayed ambivalent representations that reflected social and cultural negotiations of previously essentialised identities in the modern world Part of a wide and diverse cultural space at the beginning of the twentieth century it was acknowledged both by the intellectual avant-garde and the workers theatre movement not only as a reflexive action but also as an evolving dynamic multidisciplinary performance model which was highly influential across British culture Revue displaced the romanticism of musical comedy by combining a satirical listless detachment with a defiant sophistication that articulated a fading British hegemonic sensibility a cultural expression of a fragile and changing social and political order
