The Reading Report Card, 1971-88 Ina V. S. Mullis, Lynn Jenkins, National Assessment of Educational Progress (Project), 1990 Intended to serve as a resource for the many and varied groups concerned with improving students reading proficiencies this report from the Nation's Report Card provides a long term perspective on students reading skills and strategies based on a series of five national assessments conducted from 1971 to 1988 Each chapter of the report provides a different perspective on trends in students reading abilities The first chapter describes changes in the average reading performance of 9 13 and 17 year olds across the five reading trend assessments conducted by the National Assessment of Educational Progress NAEP between 1971 and 1988 The second chapter defines levels of reading proficiency and presents the percentages of students attaining these successive levels in each assessment The third chapter summarizes trends in students responses to questions on their reading instruction and experiences and investigates the relationships between these background factors and reading proficiency Overall the findings described in the report reveal generally positive but subtle changes in reading performance at the national level since 1971 1 nine year olds assessed in 1988 read significantly better than their counterparts assessed in 1971 but this progress was made in the 1970s 2 thirteen year olds reading achievement has fluctuated slightly over the years and 3 seventeen year old students assessed in 1988 read significantly better than their counterparts assessed in either 1971 or 1975 A procedural appendix and an appendix of data are attached
