Gunnar Myrdal Claes Berg,2025-03-04 This book offers a

comprehensive exploration of Gunnar Myrdal's life as well as his significant scientific, political, and international contributions. Recognized as one of the foremost Stockholm economists, Myrdal alongside Keynes played a pivotal role in revolutionizing economic theory during the 1930s. Together with his wife Alva Myrdal, he was instrumental in shaping the Swedish welfare state. Gunnar Myrdal was far ahead of his time in demonstrating that both a strong state and a vibrant civil society are essential for developing an inclusive welfare state. Myrdal's influence extended well beyond Sweden. His groundbreaking analysis of racial oppression in the United States, particularly in his seminal work *An American Dilemma*, is widely regarded as a landmark in the struggle for equal rights. During the Cold War, he played a key role in the United Nations efforts to rebuild Europe and sought to bridge the divide between East and West. His penetrating examination of the causes of underdevelopment in Asia, *Asian Drama*, made a significant contribution to the understanding of prejudice and colonial oppression. This book traces Gunnar Myrdal's journey from his childhood to the Nobel Memorial Prize, detailing his intense collaboration with Alva and her eventual professional independence. It compellingly illustrates how he, with clear-eyed pragmatism and a steadfast commitment to his values, addressed both Swedish and global social challenges. Remarkably, many of the issues Myrdal grappled with remain deeply relevant today, including the cracks in Sweden's welfare society, racism in the United States, the rise of authoritarian regimes, and the re-emergence of a new Cold War. This book will particularly resonate with social scientists and general readers interested in the role of institutions in development, the motivations behind the inclusive welfare state, and the crucial importance of letting value premises guide research, policy, solutions, and actions on social issues, including identity, race, and power.

How Shanghai Does It Xiaoyan Liang, Huma Kidwai, Minxuan Zhang, Yinan Zhang, 2016-04-08. The Shanghai basic education system has garnered significant attention since its extraordinary performance in the 2009 and 2012 Programme for International Student Assessment (PISA), a global assessment of 15-year-olds' educational abilities. Among the 65 participating economies in 2012, Shanghai, China, ranked first on all three major domains of PISA: mathematics, reading, and science. Shanghai also stands out for having the world's highest percentage of resilient students—students from socio-economically disadvantaged backgrounds who emerge as top performers. Shanghai's PISA story has generated intense discussions and diverse speculations in the field of international educational development, and numerous studies have been done in the attempt to unravel the mystery. Missing from the picture, however, is a more comprehensive, systematic, in-depth, and objective rendition of the policies and practices of Shanghai basic education benchmarked against others in key dimensions. This report presents an in-depth examination of how Shanghai scored highest in the areas of reading, science, and mathematics on PISA. It documents and benchmarks key policies in basic Shanghai education, provides evidence on the extent to which these policies have been implemented in schools, and explores how these policies have affected learning outcomes. The report uses PISA 2012 data to analyze Shanghai student achievement variation and to examine the extent school variables may be associated with the variation beyond family and student background. It

also uses the World Bank's Systems Approach for Better Education Results SABER an existing systems diagnostic and benchmarking tool as an organizing framework and for data collection School based surveys and other existing research shed further light on educational impact and implementation While the report attempts to adopt a systems approach particular emphasis is placed on teachers education financing balancing autonomy and accountability and student assessment
