Foerstel,2013-05-23 Despite concerted efforts from our educators administrators and government American education continues to struggle The author of this work argues that the decline can be traced to censored curricula inaccurate textbooks test driven evaluations and increasing poverty among the student population Under the definition of failure specified in the No Child Left Behind Act more than 80 percent of American schools could currently be labeled as failing while the quality of American education overall and our students performance continue to rank unfavorably against international competition This book examines the crisis in American education and identifies how weaknesses in textbooks teaching and testing have created the crisis facing American education a topic that dramatically affects students teachers and parents Author Herbert N Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today His book traces the legal basis for curricular censorship that dates back 75 years identifies the bizarre process by which shoddy textbooks have been written published and come to be widely accepted and documents the disastrous effect that reliance on these materials has had on the curriculum Foerstel also supplies a careful

assessment of the current political debate over education reform and of the proposed solutions to these problems

Simkins, Mark Maier, 2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer  
questions related to an upcoming class a few hours beforehand using an online course management system While the phrase  
just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view  
learning as a process that takes time introspection and persistence Students who experience JiTT come to class better  
prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make  
gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is  
still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being  
designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous  
knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and  
ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students

work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT's remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher Education Reprinted with permission from Hispanic Outlook in Higher Education Magazine [www.hispanicoutlook.com](http://www.hispanicoutlook.com) [The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate](#) Stephen J.
