Universities in the Knowledge Society Timo Aarrevaara,Martin Finkelstein,Glen A.

Jones,Jisun Jung,2021-09-28 Springer is proud to announce that Universities in the Knowledge Society has received the ASHE CIHE award for Significant Research on International Higher Education Congratulations to Timo Aarrevaara Martin Finkelstein Glen A Jones Jisun Jung and all contributors This book explores the complex multi faceted relationships between national research and innovation systems and higher education The transition towards knowledge societies economies is repositioning the role of the university and transforming the academic profession The volume provides a foundational introduction to the concepts of knowledge society and knowledge economy and these concepts ground the detailed case studies of eighteen systems located across five continents Each case study was written by a leading expert in that jurisdiction and provides a critical analysis of the research and development infrastructure the role of universities and the implications for the academic profession The book describes how nations in various geographic regions and at various stages of economic maturity are restructuring their university systems to adapt to the new imperatives and provides a cross case analysis

identifying common themes and distinctive features In telling the story of higher education's ongoing global metamorphosis the contributing authors place current developments in the context of the university's historic evolution survey the changing metrics that national governments are adopting to measure university performance and describe a new international project the Academic Profession in the Knowledge based Society APIKS that involved a common survey of academics in more than twenty countries to take the pulse of developments on the ground while documenting the challenges confronting knowledge workers in the new economy Creating and Managing a Sustainable Sporting Future Vassilios Ziakas, Aaron

Beacom, 2020-06-09 Creating and Managing a Sustainable Sporting Future contributes to a critical understanding of the challenges key stakeholders across the globe encounter as they seek to manage periods of transition brought about by policy change relating to the provision of sport and physical activity The book uncovers the global challenges in terms of managing the re-orientation of stakeholder activities and organisational strategies in response to the aspirations for a wider range of outcomes through sport based interventions and establishment of partnerships with non sport sectors It illuminates the increasingly erratic trajectory of sport development service providers as the environment within which sport organisations operate changes through for example climate change demographic shifts changing features of local economies and alterations to the structures of local government and governance and the responses of sport organisations to these new realities differ greatly depending on location institutional structures and leadership The chapters highlight the changing social economic environmental and policy contexts within which sports organisations operate and explain the subsequent need for new approaches to partnership working physical activity re-scoping and integrated education programming Showing that the international mandate of creating active lifestyles and subsequent re-orientation of stakeholders towards physical activity cannot only contribute to re-defining sport but also in identifying novel ways for building and managing a sustainable sporting future Creating and Managing a Sustainable Sporting Future is ideal for Sports scholars and particularly those working on Sport Policy and Sustainable sport development This book was originally published as a special issue of Managing Sport and Leisure **Towards a Framework for Representational Competence in Science Education** Kristy

L. Daniel, 2018-06-20 This book covers the current state of thinking and what it means to have a framework of representational competence and how such theory can be used to shape our understanding of the use of representations in science education assessment and instruction Currently there is not a consensus in science education regarding representational competence as a unified theoretical framework There are multiple theories of representational competence in the literature that use differing perspectives on what competence means and entails Furthermore dependent largely on the discipline language discrepancies cause a potential barrier for merging ideas and pushing forward in this area While a single unified theory may not be a realistic goal there needs to be strides taken toward working as a unified research community to better investigate and interpret representational competence An objective of this book is to initiate thinking

about a representational competence theoretical framework across science educators learning scientists practitioners and scientists As such we have divided the chapters into three major themes to help push our thinking forward presenting current thinking about representational competence in science education assessing representational competence within learners and using our understandings to structure instruction
