Physical Science Grade September 2012 Caps Exemplar:

The Path from LEO to Mars United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2013 Older Persons and the Law John Williams, 2025-05-15 This book explores the law and legal system's impact on older persons. As well as describing the current law primarily in England and in Wales, it highlights the pivotal role that elder law lawyers play in using law to challenge and combat ageism. Important questions are raised about whether the law perpetuates ageism and whether the current working of the law effectively challenges discrimination, abuse, and social exclusion faced by older persons. Elder law lawyers have an essential role in advocating for the rights of older persons. The book focuses on the need to uphold and respect the human rights of older persons, emphasising their dignity, autonomy, and right to inclusion. It examines key topics such as human rights in the context of ageing, the provision of social care, discrimination, decision-making capacities, mental health, and abuse and neglect. It also offers insights into the notion of personal liberty concerning older persons and whether existing safeguards are sufficient. The international dimensions of elder law are discussed, highlighting the range of initiatives led by the United Nations and efforts by non-governmental organisations and regional bodies. These initiatives aim to confront and diminish ageism on both international and domestic fronts, emphasising the need for a concerted effort to enforce the rights of older persons across different cultures and legal systems. This book will interest researchers, students, and practitioners specialising in family and social welfare law, elder law, human rights law, and discrimination law.

The State of Conservation Joshua Nygren, 2025-01-06 In the twentieth century, natural resource conservation emerged as a vital force in US politics, laying the groundwork for present-day sustainability. Merging environmental, agricultural, and political history, Joshua Nygren examines the political economy and ecology of agricultural conservation through the lens of the conservation industrial complex. This evolving public-private network, which united the US Department of Agriculture, Congress, local and national organizations, and the agricultural industry, guided soil and water conservation in rural America for much of the century. Contrary to the classic tales of US environmental politics and the rise and fall of the New Deal Order, this book emphasizes continuity. Nygren demonstrates how the conservation policies, programs, and partnerships of the 1930s and 1940s persisted through the age of environmentalism and how their defining traits anticipated those typically associated with late twentieth-century political culture. The conservation industrial complex promoted a development-oriented brand of conservation that aided the rise of large-scale capital-intensive agriculture, which continues today. It also reshaped the physical and political landscapes of the country, leading to impressive conservation victories and spectacular failures by privileging some environments, degrading others, and intensifying farm depopulation. In the name of environmental protection, agricultural conservation made rural America less equal.
