QUESTION 1

Various options are provided as possible answers to the following questions. Choose the correct answer and write **ONLY** the LETTER (A-D) next to the QUESTION NUMBER (1.1-1.6) on your folio paper. Example 1.7, D.

- 1.1 The graphs below show the relationship between the net force and the acceleration for two masses X and Y.

Which one of the following statements is true?

- A. A heavy object has more mass.
B. A light object has more mass.
C. A heavy object has more mass.
D. The mass of an object is directly proportional to its acceleration.
- 1.2 In which of the following cases would the resultant force acting on an object be equal to 0N?
- A. A car moving at a constant speed.
B. A car moving at a constant speed in a circular path.
C. A car moving at a constant speed in a straight line.
D. A car moving at a constant speed in a circular path.
- 1.3 Which of the statements below best describes Weightlessness?
- A. An object is not acted upon by any forces.
B. An object is not acted upon by any forces.
C. An object is not acted upon by any forces.
D. An object is not acted upon by any forces.
- 1.4 The inertia of an object...
- A. is a measure of its mass.
B. is a measure of its mass.
C. is a measure of its mass.
D. is a measure of its mass.
- 1.5 An astronaut has a weight F_g on Earth. What distance, in terms of the radius of the Earth (r), will the astronaut be if his weight is a 1/4 of his weight (F_g) on the

surface of the Earth?

- A. r
B. $2r$
C. $3r$
D. $4r$

- 1.6 A box is pushed forward with a force of 100N but does not move. A possible reason for this is that:

- A. The box is too heavy.
B. The box is too light.
C. The box is too heavy.
D. The box is too light.

QUESTION 2

The grade 11 learners learn that there is more than one way to determine the resultant of two vectors. One way is the component method. They want to use this method to find the resultant of the forces acting on a bucket by the ropes from which the bucket is suspended. The bucket is stationary.

- 2.1 Draw the free-body diagram.

(2)

- 2.2 The tension in rope P is 100N at an angle of 30° to the vertical and the tension in Q is 51,52N at 45° to the vertical.

Calculate the MAGNITUDE of the:

- 2.2.1 Resultant of the two forces.
2.2.2 Resultant of the two forces.
2.2.3 Resultant of the horizontal components.
2.2.4 Resultant of the vertical components.
2.2.5 Resultant of the two forces.

Sustainability Made Simple Rosaly Byrd,Laurèn DeMates,2017-03-17 Sustainability Made Simple is an introduction to sustainability and sustainable living that explores the relationship between everyday life and the intricate global environmental issues of today including air and water pollution deforestation and climate change Rosaly Byrd and Laur n DeMates offer an optimistic yet realistic perspective on our impact on the environment giving much needed guidance to those who are interested in finding new and relatively easy ways to incorporate sustainability into daily life An excellent

resource for those who are interested in learning what sustainability is about and picking up habits to be more sustainable Sustainability Made Simple shows that adopting a sustainable lifestyle doesn't require going off the grid or making drastic life changes that take time and cost money Instead Byrd and DeMates focus on the advantages and transformative changes associated with sustainability demonstrating that although society is facing unprecedented environmental challenges working towards sustainability is an opportunity to do things differently and do things better enhancing aspects of life such as health work and community

Drones and the Future of Air Warfare Michael P. Kreuzer, 2016-05-26 This book examines the evolution of airpower and specifically the growth and proliferation of Remotely Piloted Aircraft RPAs While most existing literature examines either the law or ethics of RPAs and some newer scholarship looks to the battlefield effectiveness the gains from strikes versus the potential for blowback etc this work investigates it from a broader military perspective It examines the strategy for employment of RPAs across the spectrum of warfare the potential deterrent value of RPAs in some circumstances and the resulting ability of RPAs to fundamentally shift the character of when and how wars are fought The central aim of this book is to evaluate the role of drones in warfare to date and make basic projections on how states will adopt RPAs and UCAVs in the future At the core is the goal of answering a broad underlying research question How will the RPA innovation impact military strategy and international security This book will be of much interest to students of airpower drone warfare military and strategic studies security studies and IR

The Long Hedge Jason West, 2017-09-08 Part of the Greenleaf Publishing Responsible Investment Series Mitigating and adapting to risks and changing circumstances is a natural part of doing business But methods of mitigating and adapting can be quite different in terms of time cost and observed impacts The impacts of mitigation activities are more immediate while the benefits of adaptation activities may take many years to take effect Nowhere is this difference more apparent than in the case of the corporate response to climate change In the context of climate change adaptation is the process of changing behaviour in response to actual or expected climate change impacts Climate change adaptation is now emerging as a critical partner to mitigation and indeed may even become the primary protection mechanism for future generations In this unique book Jason West provides a comprehensive assessment of the management of climate change adaptation in the corporate sector The book provides a formal overview of the range of approaches available along with a series of practical case studies and examples that can be used by companies and other organizations to identify assess and manage climate change adaptation A major focus is on the financial and investment implications of climate change adaptation West examines how firms can evaluate the investment decisions associated with long term climate change adaptation measures including how such investments can be valued and funded the appropriate accounting treatment of such measures and appropriate risk management and governance practices in relation to such measures The book also considers the needs and interests of investors and other stakeholders and considers how they can assess the adequacy and appropriateness of corporate action on

climate change The Long Hedge will be essential reading and a key text for risk practitioners investors financiers scholars and policy makers in the field of climate change Atoll Island States and International Law Lilian Yamamoto, Miguel Esteban, 2013-10-25 Atoll Island States exist on top of what is perceived to be one of the planet's most vulnerable ecosystems atolls It has been predicted that an increase in the pace of sea level rise brought about by increasing greenhouse gas concentrations in the atmosphere will cause them to disappear forcing their inhabitants to migrate The present book represents a multidisciplinary legal and engineering perspective on this problem challenging some common misconceptions regarding atolls and their vulnerability to sea level rise Coral islands have survived past changes in sea levels and it is the survival of coral reefs what will be crucial for their continued existence These islands are important for their inhabitants as they represent not only their ancestral agricultural lands and heritage but also a source of revenue through the exploitation of the maritime areas associated with them However even if faced with extreme climate change it could theoretically be possible for the richer Atoll Island States to engineer ways to prevent their main islands from disappearing though sadly not all will have the required financial resources to do so As islands become progressively uninhabitable their residents will be forced to settle in foreign lands and could become stateless if the Atoll Island State ceases to be recognized as a sovereign country However rather than tackling this problem by entering into lengthy negotiations over new treaties more practical solutions encompassing bilateral negotiations or the possibility of acquiring small new territories should be explored This would make it possible for Atoll Island States in the future to keep some sort of international sovereign personality which could benefit the descendants of its present day inhabitants **Cost, Effectiveness, and Deployment of Fuel Economy**

An Introduction to the Green Economy Adrian C. Newton,Elena Cantarello,2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy
