Physical Science Paper 1 November Memorandum 2013:

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures **Space**

Studies Board Annual Report 2013 National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, 2014-04-09 The original charter of the Space Science Board was established in June 1958 3 months before the National Aeronautics and Space Administration NASA opened its doors The Space Science Board and its successor the Space Studies Board SSB have provided expert external and independent scientific and programmatic advice to NASA on a continuous basis from NASA's inception until the present The SSB has also provided such advice to other executive branch agencies including the National Oceanic and Atmospheric Administration NOAA the National Science Foundation NSF the U S Geological Survey USGS the Department of Defense as well as to Congress Space Studies Board Annual Report 2013 covers a message from the chair of the SSB Charles F Kennel This report also explains the origins of the Space Science Board how the Space Studies Board functions today the SSB's collaboration with other National Research Council units assures the quality of the SSB reports acknowledges the audience and sponsors and expresses the necessity to enhance the outreach and improve dissemination of SSB reports This report will be relevant to a full range of government audiences in civilian space research including NASA NSF NOAA USGS and the Department of Energy as well members of the SSB policy makers and researchers A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk

Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals

published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Bulk Collection of Signals Intelligence National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Responding to Section 5(d) of Presidential Policy Directive 28: The Feasibility of Software to Provide Alternatives to Bulk Signals Intelligence Collection, 2015-03-24 The Bulk Collection of Signals Intelligence Technical Options study is a result of an activity called for in Presidential Policy Directive 28 PPD 28 issued by President Obama in January 2014 to evaluate U S signals intelligence practices The directive instructed the Office of the Director of National Intelligence ODNI to produce a report within one year assessing the feasibility of creating software that would allow the intelligence community more easily to conduct targeted information acquisition rather than bulk collection ODNI asked the National Research Council NRC the operating arm of the National Academy of Sciences and National Academy of Engineering to conduct a study which began in June 2014 to assist in preparing a response to the President Over the ensuing months a committee of experts appointed by the Research Council produced the report

The Source of All Things Reinhard Friedl, 2025-08-22 In the tradition of Henry Marsh's Do No Harm Reinhard Friedl's The Source of All Things is a heart surgeon's personal investigation of the human heart moving from his riveting clinical experiences to a more poetic understanding of its workings The heart is our most important organ Yet despite that it has not changed since the appearance of Homo sapiens 300 000 years ago it is also our most mysterious In most human cultures it is seen as the source of love sympathy joy courage strength and wisdom What if the heart could answer questions neurosciences can't begin to Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre each one individual like a fingerprint heart surgeon Reinhard Friedl looked again at this primitive pump to reconcile it with his experiences from thousands of heart operations In this book he presents findings from various scientific disciplines such as secret connections of the heart and brain and their influence on emotions and consciousness He reveals the miracle that is the heart that we speak about so often yet is strangely foreign to many human beings Full of compelling patient stories The Source of All Things ends with a plea that we recognize the heart's wisdom and adopt a more heart centered way of living leading to greater health and more joy

Overcoming Barriers to Deployment of Plug-in Electric Vehicles National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Overcoming Barriers to Electric-Vehicle Deployment,2015-06-26 In the past few years interest in plug in electric vehicles PEVs has grown Advances in battery and other technologies new federal standards for carbon dioxide emissions and fuel economy state zero emission vehicle requirements and the current administration s goal of putting millions of alternative fuel vehicles on the road have all highlighted PEVs as a transportation alternative Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles such as lower operating costs smoother operation and better acceleration the ability to fuel up at home and zero tailpipe emissions when the vehicle operates solely on its battery There are however barriers to PEV deployment including the vehicle cost the short all electric driving range the long battery charging time uncertainties about battery life the few choices of vehicle models and the need for a charging infrastructure to support PEVs What should industry do to improve the performance of PEVs and make them more attractive to consumers At the request of Congress *Overcoming Barriers to Deployment of Plug in Electric Vehicles* identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers This report examines the characteristics and capabilities of electric vehicle technologies such as cost performance range safety and durability and assesses how these factors might create barriers to widespread deployment *Overcoming Barriers to Deployment of Plug in Electric Vehicles* provides an overview of the current status of PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers Through consideration of consumer behaviors tax incentives business models incentive programs and infrastructure needs this book studies the state of the industry and makes recommendations to further its development and acceptance

Breakout Newt Gingrich,2013-11-04 It is not between the Left and the Right but between the past and the future America is on the edge of a breakout In fact we are poised for one of the most spectacular leaps in human well being in history Pioneers of the future innovators and entrepreneurs are achieving breakthroughs in medicine transportation energy education and other fields that will make the world a dramatically different and better place Unless the prison guards of the past stop them Every American must choose a side Will you be a champion of the future or a prisoner of the past Every potential breakthrough has to get past a host of individuals and institutions whose power and comfort depend on the status quo These prison guards of the past will strangle every innovation that threatens to change the way things have always been done if we let them

Technological Innovation in Legacy Sectors William B. Bonvillian,Charles Weiss,2015-08-18 The American economy misses opportunities for innovation growth and job creation because of a neglected problem the resistance to innovation from Legacy sectors like energy manufacturing and health care which constitute most of our

economy The book offers systematic strategies to overcome the structural obstacles to innovation in critically important Legacy sectors

Fluid Mechanics and Hydraulics Vedat Batu, 2024-05-27 Fluid Mechanics and Hydraulics Illustrative Worked Examples of Surface and Subsurface Flows presents the basic principles of fluid mechanics through the use of numerous worked examples Some readers may have interest only in the application parts of various principles without paying too much attention to the derivation details of equations Other readers may have interest both in derivation details and their applications As a result this book is designed to address both needs and most derivation details are included as example problems Therefore those who are not interested in the details of derivations may skip them without interrupting the effective use of the book It serves as an effective learning source for college students and as a teaching tool for instructors with an included solutions manual as well as for practicing professionals in the areas of fluid mechanics and hydraulics

The Age of Radiance Craig Nelson, 2014-03-25 Radiation is a complex and paradoxical concept staggering amounts of energy flow from seemingly inert rock and that energy is both useful and dangerous While nuclear energy affects our everyday lives from nuclear medicine and food irradiation to microwave technology its invisible rays trigger biological damage birth defects and cellular mayhem From the end of the nineteenth century through the use of the atomic bomb in World War II to the twenty first century s confrontation with the dangers of nuclear power Craig Nelson illuminates a pageant of fascinating historical figures Enrico Fermi Marie and Pierre Curie Albert Einstein FDR Robert Oppenheimer and Ronald Reagan among others He reveals many little known details including how Jewish refugees fleeing Hitler transformed America from a country that created light bulbs and telephones into one that split atoms how the most grotesque weapon ever invented could realize Alfred Nobel s lifelong dream of global peace how emergency workers and low level utility employees fought to contain a run amok nuclear reactor while wondering if they would live or die Brilliantly fascinating and remarkably accessible The Age of Radiance traces mankind s complicated and difficult relationship with the dangerous power it discovered and made part of civilization

Vibrio ecology, pathogenesis and evolution Rita R Colwell, Daniela Ceccarelli, 2014-10-24 Vibrios are Gram negative bacilli that occur naturally in marine estuarine and freshwater systems Some species include human and animal pathogens capable of causing gastroenteritis wound infections cholera and fatal septicemia Over the past decades cutting edge research on Vibrio genomics has promoted a tremendous advance in our knowledge of these pathogens Significant developments include the discovery of emerging epidemic clones tracking the spread of new strain variants and an intensified appreciation of the role of mobile genetic elements in antibiotic resistance spread as well as pathogenesis Furthermore improved understanding of the interaction of Vibrios with a variety of living organisms in the aquatic environment has documented the significant role of environmental reservoirs in their seasonal cycle favoring persistence of the pathogen during inter epidemic periods and enhancing disease transmission This Research Topic is dedicated to our current understanding in these areas and will bring together leading experts in the field to provide a deep

overview of Vibrios ecology and evolution and will suggest the pathway of future research in this field *Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions* National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Applied and Theoretical Statistics, Committee on Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions, 2017-03-06 The Office of the Under Secretary of Defense Personnel Readiness referred to throughout this report as P R is responsible for the total force management of all Department of Defense DoD components including the recruitment readiness and retention of personnel Its work and policies are supported by a number of organizations both within DoD including the Defense Manpower Data Center DMDC and externally including the federally funded research and development centers FFRDCs that work for DoD P R must be able to answer questions for the Secretary of Defense such as how to recruit people with an aptitude for and interest in various specialties and along particular career tracks and how to assess on an ongoing basis service members career satisfaction and their ability to meet new challenges P R must also address larger scale questions such as how the current realignment of forces to the Asia Pacific area and other regions will affect recruitment readiness and retention While DoD makes use of large scale data and mathematical analysis in intelligence surveillance reconnaissance and elsewhere exploiting techniques such as complex network analysis machine learning streaming social media analysis and anomaly detection these skills and capabilities have not been applied as well to the personnel and readiness enterprise Strengthening Data Science Methods for Department of Defense Personnel and Readiness Missions offers and roadmap and implementation plan for the integration of data analysis in support of decisions within the purview of P R The Soul of Genius Jeffrey Orens, 2021-07-06 A prismatic look at the meeting of Marie Curie and Albert Einstein and the impact these two pillars of science had on the world of physics which was in turmoil In 1911 some of the greatest minds in science convened at the First Solvay Conference in Physics a meeting like no other Almost half of the attendees had won or would go on to win the Nobel Prize Over the course of those few days these minds began to realize that classical physics was about to give way to quantum theory a seismic shift in our history and how we understand not just our world but the universe At the center of this meeting were Marie Curie and a young Albert Einstein In the years preceding Curie had faced the death of her husband and soul mate Pierre She was on the cusp of being awarded her second Nobel Prize but scandal erupted all around her when the French press revealed that she was having an affair with a fellow scientist Paul Langevin The subject of vicious misogynist and xenophobic attacks in the French press Curie found herself in a storm that threatened her scientific legacy Albert Einstein proved an supporter in her travails They had an instant connection at Solvay He was young and already showing flourishes of his enormous genius Curie had been responsible for one of the greatest discoveries in modern science radioactivity but still faced resistance and scorn Einstein recognized this grave injustice and their mutual admiration and respect borne out of this their first meeting would

go on to serve them in their paths forward to making history Curie and Einstein come alive as the complex people they were in the pages of *The Soul of Genius* Utilizing never before seen correspondence and notes Jeffrey Orens reveals the human side of these brilliant scientists one who pushed boundaries and demanded equality in a man's world no matter the cost and the other who was destined to become synonymous with genius

Reclamation of Mine-impacted Land for Ecosystem Recovery Nimisha Tripathi, Raj S. Singh, Colin D.

Hills, 2016-02-04 Mining activities significantly impact the environment they generate huge quantities of spoil promote deforestation and the loss of agricultural production as well as releasing contaminants that result in the loss of valuable soil resources These negative impacts are now being recognized and this book shows how corrective action can be taken The introduction of sustainable mining requires mitigation strategies that start during the mine planning stage and extend to after mineral extraction has ceased and post closure activities are being executed Reclamation of Mine impacted Land for Ecosystem Recovery covers methods of rejuvenation of mine wasteland including different practices of physical chemical and ecological engineering methods benefits of rejuvenation stabilization of land surfaces pollution control aesthetic improvement general amenity plant productivity and carbon sequestration as well as restoring biodiversity and ecosystem function best management practices and feasible solutions to the impacts of mining which will reduce the pollution load by reducing the discharge rate and the pollutant concentration reduce erosion and sedimentation problems and result in improved abandoned mine lands and ecosystem development The authors explain how mining impacts on soil properties and how soil carbon reserves soil fertility can be restored when mining has ceased Restoration involves a coordinated approach

that recognizes the importance of key soil properties to enable re vegetation to take place rapidly and ecosystems to be established in a low cost and sustainable way This book s unique combination of the methods for reclamation technologies with policies and best practice worldwide will provide the background and the guidance needed by scientists researchers and engineers engaged in land reclamation as well as by industry managers **Nation-Building in Indian Anthropology**

Abhijit Guha,2022-10-06 Researches on the history of anthropological studies in India unlike in western countries has not yet been an established tradition despite the fact that courses on the growth and development of anthropology in India are being taught at the graduate and postgraduate levels in the Indian universities and are strongly recommended by the University Grants Commission Indian anthropologists however in the early decades after the independence made inspiring and solid research contributions on the major problems encountered by the new nation which has been described and analysed in detail in this book These problems include rehabilitation of refugees after the 1947 Partition and displacement of people from their homes and land caused by the big dams industrialization and famines This book result of years of painstaking research by the author critically reviews the existing works and their gaps in the history of Indian anthropology and makes a new and valuable addition in the field of the history of academic disciplines in the context of nation building It should be read not only as a text by the students of anthropology and sociology but also as a reference work for researchers interested in the history of social sciences and development studies in India Assessment of Advanced Solid-State Lighting National Research

Council,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Assessment of Solid-State Lighting,2013-04-27 The standard incandescent light bulb which still works mainly as Thomas Edison invented it converts more than 90% of the consumed electricity into heat Given the availability of newer lighting technologies that convert a greater percentage of electricity into useful light there is potential to decrease the amount of energy used for lighting in both commercial and residential applications Although technologies such as compact fluorescent lamps CFLs have emerged in the past few decades and will help achieve the goal of increased energy efficiency solid state lighting SSL stands to play a large role in dramatically decreasing U S energy consumption for lighting This report summarizes the current status of SSL technologies and products light emitting diodes LEDs and organic LEDs OLEDs and evaluates barriers to their improved cost and performance Assessment of Advanced Solid State Lighting also discusses factors involved in achieving widespread deployment and consumer acceptance of SSL products These factors include the perceived quality of light emitted by SSL devices ease of use and the useful lifetime of these devices issues of initial high cost and possible benefits of reduced energy consumption *Polio Wars* Naomi Rogers,2013-10-20 During World War II polio epidemics in the United States were viewed as the country s other war at home they could be neither predicted nor contained and paralyzed patients faced disability in a world unfriendly to the disabled These realities were exacerbated by the medical community s enforced orthodoxy in treating the disease treatments that generally consisted of ineffective therapies Polio

Wars is the story of Sister Elizabeth Kenny Sister being a reference to her status as a senior nurse not a religious designation who arrived in the US from Australia in 1940 espousing an unorthodox approach to the treatment of polio Kenny approached the disease as a non neurological affliction championing such novel therapies as hot packs and muscle exercises in place of splinting surgery and immobilization Her care embodied a different style of clinical practice one of optimistic patient centered treatments that gave hope to desperate patients and families The Kenny method initially dismissed by the US medical establishment gained overwhelming support over the ensuing decade including the endorsement of the National Foundation for Infantile Paralysis today s March of Dimes America s largest disease philanthropy By 1952 a Gallup Poll identified Sister Kenny as most admired woman in America and she went on to serve as an expert witness at Congressional hearings on scientific research a foundation director and the subject of a Hollywood film Kenny breached professional and social mores crafting a public persona that blended Florence Nightingale and Marie Curie By the 1980s following the discovery of the Salk and Sabin vaccines and the March of Dimes withdrawal from polio research most Americans had forgotten polio its therapies and Sister Kenny In examining this historical arc and the public s process of forgetting Naomi Rogers presents Kenny as someone worth remembering Polio Wars recalls both the passion and the practices of clinical care and explores them in their own terms

Integer Programming and Related Areas C. Kastning, 2013-11-11 Integer Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries
