Pharmacist Exam Planner Solved Papers *Learning to Save the World* Betsey Behr Brada,2023-02-15 Learning to Save the World provides an innovative analysis of how individuals inhabit, refuse and reconfigure the contours of global health. In 2001 Botswana's government, faced with one of the highest HIV prevalence rates in the world, committed itself to sub-Saharan Africa's first free public HIV treatment program. US-based private foundations and medical schools offered support to demonstrate the feasibility of public HIV treatment in Africa. Given US interest and investment in global health, this support created opportunities for US physicians and medical trainees to interact with local practitioners, treat patients and shape health policy in Botswana. Although global health has emerged as a powerful call to planetary moral action, the nature of this exhortation remains unclear. Is global health a new movement for social justice or is it neocolonial, creating new dependencies under the banner of humanitarianism? Betsey Behr Brada shows that global health is a frontier, an imaginative framework that organizes the space, time and ethics of encounter. Learning to Save the World reveals how individuals and collectivities engaged in global health, visiting experts as well as local clinicians and patients, come to regard themselves and others in terms of this framework.

Sharing Clinical Trial Data Institute of Medicine, Board on Health Sciences Policy, Committee on Strategies for Responsible Sharing of Clinical Trial Data, 2015-04-20 Data sharing can accelerate new discoveries by avoiding duplicative trials, stimulating new ideas for research and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators. At the same time, sharing clinical trial data presents risks, burdens and challenges. These include the need to protect the privacy and honor the consent of clinical trial participants, safeguard the legitimate economic interests of sponsors and guard against invalid secondary analyses which could undermine trust in clinical trials or otherwise harm public health. Sharing Clinical Trial Data presents activities and strategies for the responsible sharing of clinical trial data. With the goal of increasing scientific knowledge to lead to better therapies for patients, this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks. This report offers guidance on the types of clinical trial data available at different points in the process, the points in the process at which each type of data should be shared, methods for sharing data, what groups should have access to data and future knowledge and infrastructure needs. Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses, strengthen the evidence base for regulatory and clinical decisions and increase the scientific knowledge gained from investments by the funders of clinical trials. The recommendations of Sharing Clinical Trial Data will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment. This book will be of interest to stakeholders across the spectrum of research, from funders to researchers to journals to physicians and ultimately to patients.

GENERAL SCIENCE SOLVED PAPERS YCT EXPERT TEAM, 2020 RRB GENERAL SCIENCE SOLVED PAPERS **Simulating Social Complexity** Bruce Edmonds, Ruth Meyer, 2017-11-24 This volume examines all aspects of using agent or individual based simulation This approach represents systems as individual elements having their own set of differing states and internal processes The interactions between elements in the simulation represent interactions in the target systems What makes this social is that it can represent an observed society Social systems include all those systems where the components have individual agency but also interact with each other This includes human societies and groups but also increasingly socio technical systems where the internet based devices form the substrate for interaction These systems are central to our lives but are among the most complex known This poses particular problems for those who wish to understand them The complexity often makes analytic approaches infeasible but on the other hand natural language approaches are also

inadequate for relating intricate cause and effect This is why individual and agent based computational approaches hold out the possibility of new and deeper understanding of such systems This handbook marks the maturation of this new field It brings together summaries of the best thinking and practices in this area from leading researchers in the field and constitutes a reference point for standards against which future methodological advances can be judged This second edition adds new chapters on different modelling purposes and applying software engineering methods to simulation development Revised existing content will keep the book up to date with recent developments This volume will help those new to the field avoid reinventing the wheel each time and give them a solid and wide grounding in the essential issues It will also help those already in the field by providing accessible overviews of current thought The material is divided into four sections Introduction Methodology Mechanisms and Applications Each chapter starts with a very brief section called Why read this chapter followed by an abstract which summarizes the content of the chapter Each chapter also ends with a section on Further Reading Whilst sometimes covering technical aspects this second edition of *Simulating Social Complexity* is designed to be accessible to a wide range of researchers including both those from the social sciences as well as those with a more formal background It will be of use as a standard reference text in the field and also be suitable for graduate level courses

The Adulteration of Children's Sports Kristi Erdal,2020-07-20 *The Adulteration of Children's Sports* explores current behavioral and physiological research about how children's organized sport has changed how adults goals and needs are at the heart of those changes and the consequences of those changes on children's enjoyment of sport and on their autonomy creativity and moral reasoning outside of sport Adult introduction of early competition extrinsic rewards early sport specialization and year round participation has thwarted children's intrinsic motivation and contributed to children's attrition from sport Kristi Erdal explores concerns about the future of sport itself as adult mediated selection practices whittle down young athletes earlier on shakier criteria Parents and coaches complicity in these practices however is based on intermediaries poorly interpreting or ignoring the research literature Thus the final chapters of this book are about translating the research into applied ideas for change Erdal provides an essential introduction to evidence based research about children's health and well being in sport and debunks myths along the way Adults built the problems compiled in this text We can dismantle them as well

Brief Interventions for Risky Drinkers Antoni Gual, Peter Anderson, Hugo López-Pelayo, Jillian Reynolds, 2016-06-29 Alcohol is the sixth leading risk factor for disability and premature death all over the world and one of the leading causes of premature mortality in western societies it is a leading risk factor for death in young and middle age males Heavy drinking accounts for about two thirds of the burden of disease attributable to alcohol In the early 1980s screening and brief interventions SBI in primary health care settings were proposed as effective strategies to identify risky drinkers and to help them reduce their drinking Since then a growing body of evidence including several meta analysis and Cochrane reviews has shown the efficacy and effectiveness of SBI in primary health settings However demonstrating the effectiveness of SBI has not been insufficient to facilitate its general implementation in the routines of primary health care physicians and in fact the dissemination of SBI has proven to be a difficult business Qualitative and quantitative research has identified most of the facilitators and barriers for its implementation and publicly funded research has been earmarked to address the dissemination problems worldwide Some examples are the World Health Organization Phase III and Phase IV studies on the identification and management of alcohol related problems in primary care EU funded projects PHEPA AMPHORA ODHIN BISTAIRS the UK SIPS trials and the SBIRT developments sponsored by the Substance Abuse what length should they be is there a need for booster sessions is there added value of a motivational approach These questions together with other relevant aspects of SBI need ongoing research In recent years SBIs have been tested in settings other than primary health care including hospitals accident and emergency rooms criminal justice colleges and universities social services and pharmacies In some of those areas the evidence is scarce for example pharmacies while in others it is very promising for example students and hospitals New technologies have also offered the possibility of online tools and in the last few years different digital based applications have been tested successfully as new ways to deliver effective SBIs to larger amounts of people Brief interventions have also spread to drugs other than alcohol This book aims to be an update of the state of the art of brief advice It is a compilation of articles published by some of the most relevant

researchers in the field in *Frontiers in Psychiatry* between 2014 and 2016 *Panoramic View of Cognitive Impairment: Interdisciplinary Cognitive Research* Fangyi Xu, 2024-08-01 Cognition information processing activities for individuals to understand the objective world reflects the real world in the human brain Cognitive impairment refers to a decline in cognitive functioning of varying degrees from subjective cognitive impairment to severe dementia With the accelerated global population aging the number of people with cognitive impairment is increasing rapidly Dementia has become a major contributor to the global burden of disease and loss of disability adjusted life years Cognitive impairment is a heterogeneous syndrome the cause of which is still myriad Although significant advancement in the understanding of the pathology of cognitive impairment has been made in recent decades the tools and strategies at our disposal to deal with cognitive impairment are still very limited Currently no disease modified treatment has been identified Interdisciplinary research refers to the methodology of comprehensive understanding or problem solving through the intersection between natural science and social science and other disciplines or the internal intersection between many disciplines within a certain category of science It is conducive to the overall understanding of problems and identifying effective solutions to complex problems faced by human society In recent years studies in many fields other than neurology have inspired our understanding of cognitive impairment putting forward new insights into its phenomenology and providing many effective prevention or alleviation strategies to delay cognitive decline or manage the symptoms It is very likely that interdisciplinary research would shed a light on our efforts to cope with the challenges brought by the growing epidemic of cognitive impairment **Mechanisms underlying firing in healthy and sick human motoneurons** Parveen N.S. Bawa, Maria Piotrkiewicz, Annie Schmied, 2015-07-08 Since the latter half of the twentieth century an enormous amount of knowledge about mammalian motoneuron pools has been collected This progress was enabled mostly by the development of the precise techniques of intracellular recordings in acute animal experiments many of which were conducted under deep anaesthesia Recently obtained evidence indicates that anaesthetics used at that times changed certain properties of the cell membrane which might affect firing of the neuron Experiments on normal humans gets around this problem which lets one compare MN firing characteristics in humans and reduced preparations Firing pattern of human motoneurons is obtained indirectly by recording from a few muscle fibres of a motor unit Since there is one to one relationship between motor unit and motoneuron firing the statistical analysis of motor unit firing is equivalent to the analysis of motoneuron firing This analysis based on the essential knowledge about motoneuron physiology gained from the direct measurements in animal experiments and verified by computer simulations allows one to draw conclusions about the physiological properties of human motoneurons For obvious reasons the deductions made on properties of human motoneuron from these analyses should be accepted with caution On the other hand human experiments provide the unique opportunity to study intact motoneurons during normal physiological behavior Thus combining information obtained from animal and human experiments and computer simulations

gives insight into underexplored problems of motor control This E book contains a collection of articles with range of exciting findings on the physiology and pathology of human motoneurons The collection covers such important issues concerning firing of healthy motoneurons as recruitment and rate coding as well as motoneuron excitability discusses intrinsic motoneuron properties disclosed by studying double discharges and provides information on broad spectrum of motoneuron pathology It is our hope that this collection promotes further expansion of knowledge on human motoneurons
