Education and Sustainability Michelle Y. Merrill, Patricia Burkhardt-Holm, Chew-Hung Chang, Md Saidul Islam, Youngho Chang, 2017-09-13 This book provides an introduction to the state of sustainability education in Asia. It covers national policies, institutional policies and practices within Asian universities, sustainability considerations for teacher training at schools of education and pedagogical practices for sustainability in higher education. With contributors from universities and NGOs in Indonesia, Singapore, Malaysia, Thailand, the Philippines, Cambodia, India, China, and South Korea, this volume brings together the best papers from a series of successful international conferences on post secondary education for sustainability in Asia. The book is organized into five parts: Part I focuses on paradigms for sustainability education; Part II looks at sustainability education contexts, strategies and outcomes at the national level; Part III gives examples of sustainability programs and strategies adopted at specific universities; Part IV highlights sustainability education research from schools of education; Part V explores specific examples of post secondary educational practices in sustainability.

People Forced to Flee United Nations High Commissioner for Refugees, 2022-02-16 People in danger have received protection in communities beyond their own from the earliest times of recorded history. The causes: war, conflict, violence, persecution, natural disasters, and climate change are as familiar to readers of the news as to students of the past. It is 70 years since nations in the wake of World War II drew up the landmark 1951 Convention relating to the Status of Refugees. *People Forced to Flee* marks this milestone. It is the latest in a long line of publications stretching back to 1993 that were previously entitled *The State of the World's Refugees*. The book traces the historic path that led to the 1951 Convention, showing how history was made by taking the centuries-old ideals of safety and solutions for refugees to global practice. It maps its progress during which international protection has reached a much broader group of people than initially envisaged. It examines international responses to forced displacement within borders as well as beyond them and the protection principles that apply to both. It reviews where they have been used with consistency and success and where they have not. At times the strength and resolve of the international community seems strong, yet solutions and meaningful solidarity are often elusive. Taking stock today at this important anniversary is all the more crucial as the world faces increasing forced displacement. Most is experienced in low and middle income countries and persists for generations. People forced to flee face barriers to improving their lives, contributing to the communities in which they live, and realizing solutions. Everywhere an effective response depends on the commitment to international cooperation set down in the 1951 Convention, a vision often compromised by efforts to minimize responsibilities. There is growing recognition that doing better is a global imperative. Humanitarian and development action has the potential to be transformational, especially when grounded in the local context.

People Forced to Flee examines how and where increased development investments in education health and economic inclusion are helping to improve socioeconomic opportunities both for forcibly displaced persons and their hosts In 2018 the international community reached a Global Compact on Refugees for more equitable and sustainable responses It is receiving deeper support People Forced to Flee looks at whether that is enough for what could and should help define the next 70 years *The Routledge Handbook of Planning for Health and Well-Being* Hugh Barton,Susan Thompson,Sarah Burgess,Marcus Grant,2015-05-22 Urban planning is deeply implicated in both the planetary crisis of climate change and the personal crises of unhealthy lifestyles Worldwide health issues such as obesity mental illness growing health inequalities and climate vulnerability cannot be solved solely by medicines but also by tackling the social economic and environmental determinants In a time when unhealthy and unsustainable conditions are being built into the physical fabric of cities a new awareness and strategy is urgently needed to putting health and well being at the heart of planning The Routledge Handbook of Planning for Health and Well being authoritatively and comprehensively integrates health into planning strengthening the hands of those who argue and plan for healthy environments With contributions from international leaders in the field the Handbook of Planning for Health and Well being provides context philosophy research processes and tools of experienced practitioners through case studies from four continents **Probing Parapsychology** Grant R. Shafer,2023-05-29 Parapsychology is a science made controversial by its subjects extrasensory perception psychokinesis mind over matter and disembodied minds which imply life after death Moreover these parapsychological phenomena called psi challenge physicalism the philosophy that everything can be completely understood in terms of physics This book is a snapshot of the parapsychological field with essays written by authors of diverse academic backgrounds and experiences Essays examine parapsychological phenomena from prehistory through the founding of the science by intellectuals distressed by physicalism to the postmodern present It includes both experimental and theoretical evaluations of the phenomena Parapsychology is a science which may overturn the philosophy which has dominated science since Newton and may inspire curious readers who are disheartened by the consequent denial of the spirit Corporate Power and Human Rights Manette Kaisershot,Nicholas Connolly,2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business

and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights Consciousness and Being Robert C. Trundle, 2019-02-14 This book is of vital interest to anyone who yearns to know how science theology ethics art and politics do really afford objective truths Not only that but how these truths in seemingly clashing areas are interrelated by common sense and rooted in our incontrovertible consciousness of Being itself Being itself as the basis for truth is defended against truth denying modern philosophers who having headed in the wrong direction with tragic costs of murderous ideologies have completely misunderstood the simple origin of truth in the realist tradition of Aristotle Aquinas Etienne Gilson and others Their profoundness is not bamboozled by the covert and corrupting sophism of today's teachings Anyone interested in surmounting these teachings that include political correctness and a false divide of fact from value which paralyze the very modern ethics that helped to create them should read this book The book reveals how ethics art and politics can be as true as the sciences that inform them **Research Handbook on Climate**

Governance Karin Bäckstrand, Eva Lövbrand, 2015-11-27 The 2009 United Nations climate conference in Copenhagen is often represented as a watershed in global climate politics when the diplomatic efforts to negotiate a successor agreement to the Kyoto Protocol failed and was replaced by a fragmented and decentralized climate governance order In the post Copenhagen landscape the top down universal approach to climate governance has gradually given way to a more complex hybrid and dispersed political landscape involving multiple actors arenas and sites The Handbook contains contributions from more than 50 internationally leading scholars and explores the latest trends and theoretical developments of the climate governance scholarship **Newton and Empiricism** Zvi Biener, 2014 This is the first volume of original commissioned papers on the subject of Newton and empiricism The chapters contributed by a leading team of both established and younger international scholars explore the nature and extent of Newton's relationship to a variety of empiricisms and empiricists

Among the many significant contributions of the volume are a detailed engagement with Newton's optical writings a careful contextualization of Newton's methods in seventeenth century context a critical analysis of the ways in which Locke and Hume responded to Newton and a history of the reception of Newton's methods in astronomy *Economic Evaluation of*

Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism Stollmann, Jörg, Wolf, Konrad, Brück, Andreas, Frank, Sybille, Million, Angela, Misselwitz, Philipp, Schlaack, Johanna, Schröder, Carolin, 2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after

takes care for and fosters this resource without exhausting it. Commoning is a practice that seems closer than any other practice to a sustainable way of life. Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered, developed and advocated? This question is by no means merely theoretical. It is also a very practical question which pertains to the management and distribution of the resources we depend on. It is a very political question as it demands negotiation and the taking of sides. And it is an ethical question in that it relates to how we respect and stand up for each other, our fellow human beings and also the non-human nature for which we are responsible. The essays and transcripts of the symposium *Beware of Smart People* want to make a first contribution and stimulate future research in the field. Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten. Städte in denen wir arbeiten und bei denen wir forschen entwickeln Smart City Strategien und Forschungsförderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen. Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung, ökonomisches Wachstum, höhere Lebensqualität, Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels. Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen für mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen. Neue urbane Akteure werden zu Agenten, indem sie ihre Erfahrungswissen, ihre lokalen Kenntnisse, ihre sozialen Netzwerke und Fähigkeiten zur Kooperation und Kollaboration einbringen. Hintergrund dieser Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City, welcher sich zunehmend Gehör verschafft. Der Diskurs über die Gemeingüter der Commons. Commons werden definiert als das Zusammenspiel von Ressourcen, Menschen und Praktiken. Ressourcen, die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning, welche die Ressource schonend bewirtschaftet, ohne sie zu verbrauchen. In diesem Sinne scheint Commoning eine Praxis, die einer nachhaltigen Lebensweise am nächsten kommt. Sind diese zwei Diskurse der Diskurs über die Smart City und jener über die urbanen Gemeingüter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten, welche offen gelegt, weiter entwickelt und verfechtet werden sollten? Diese Frage ist keineswegs eine rein theoretische. Sie ist eine sehr praktische Frage, da sie auf die Verteilung und das Management lebenswichtiger Ressourcen zielt. Sie ist eine politische Frage, da sie Auseinandersetzung und Parteinahme einfordert. Und sie ist eine ethische Frage, denn sie fordert gegenseitigen Respekt und Einsatz ein für unsere Mitmenschen sowie für die nichtmenschliche Natur, für die wir Verantwortung tragen. Die Texte und Aufzeichnungen des Symposiums *Beware of Smart People* wollen hierzu einen Beitrag leisten und zukünftige Forschungsvorhaben stimulieren.
