trends of suburbanization that attached development onto existing municipalities Step by step he describes what happened in each of these communities during the presentation of the initial proposal how parties interacted with each other and how the climate of the community influenced the actions of the parties Basing his work on hundreds of interviews attendance at public meetings and a review of many articles and documents Kaiser shows that in each case the emergence of controversy and degree of acceptance was influenced by the developer s leadership the characteristics of the developer s organization and the method of presenting the proposal to the public Kaiser brings to his comparative approach a background in the rough and tumble of day to day project management and the development of plans as well as their administration First published in 1978 *The Building of Cities* remains an invaluable resource for developers architects public officials and citizens involved in local government
