Twentieth Century Russia Donald Treadgold, 2018-05-04 Donald Treadgold was one of the most distinguished Russian historians of his generation. His *Twentieth Century Russia* a standard text in colleges and universities for several decades has been regularly revised and expanded to reflect new events and scholarship. The present revision by Professor Herbert Ellison contains a major chapter on the Yeltsin era and brings the Russian story to the final year of the century. Twice in the twentieth century the collapse of the Russian state and empire has been followed by an effort to build a democracy on the Western model. The first effort succumbed within a few months to Lenin's communist revolution whose ideas and institutions dominated the history of Russia and eventually much of the world during the succeeding seventy-four years. In August 1991 an attempt by Soviet leaders to suppress democratic and nationalist movements unleashed by the Gorbachev reforms and already victorious in Eastern Europe precipitated instead an anti-communist revolution under the leadership of Boris Yeltsin. The revolution and the sweeping transformation that followed are treated in the new edition which assesses the aims and scope of the first decade of Russia's second revolution. The transformation included a new constitutional structure, two fully democratic parliamentary elections and a presidential election with another of each soon to come, a vigorous revival of political parties and political debate and major questions about Russia's political future. Against the broad background of the Russian experience over a turbulent century it raises the major questions: What are the prospects for Russian democracy? Why are the communists following an anti-communist revolution the most powerful parliamentary party in Russia's new parliament and what is their impact? Why has the conversion to a market economy proved so difficult and painful and what are its prospects? How has Russia related to the new states that were once fellow republics of the USSR? Why has the foreign policy of the new Russian democracy moved from a vision of partnership with the US to a reality of conflict and confrontation? *Twentieth Century Russia* poses these questions and many more for the student and the general reader alike against the fascinating background of Russia's experience before, during and since the era of communist rule, exploring the roots of current developments in the communist and pre-communist past.

Revolutionary States, Leaders, and Foreign Relations Houman A. Sadri, 1997-04-16 This book compares and contrasts the foreign relations strategies of China, Cuba and Iran in the first decade of their post-revolutionary periods. Among a variety of explanatory variables, leadership, particularly the type of revolutionary leaders, played a significant role in explaining the outcome of the policymaking process in each case. Three distinct patterns of foreign relations strategies are evident among all three revolutionary regimes in the ten-year period: Two-Track, Conflictual and Conciliatory. This book is a valuable source for both experts and non-experts alike in providing insight into the foreign relations of revolutionary regimes in developing countries and in helping U.S. policymakers anticipate behaviors of future revolutionary leaders. A focal point of this book is the examination of the nonalignment strategies of these prominent developing countries during the infancy of their regimes. Each state's particular strategy is

described and explained in detail and then contrasted and compared Although there are differences among their foreign policies considering their geographic locations size wealth military capabilities leadership characteristics and political institutions there are significant similarities regarding their foreign policy goals and trends in their foreign relations with the Great Powers Among explanatory factors leadership played a significant role in the policy making process although the foreign relations strategies of these revolutionary regimes were fed by a combination of national and international variables In all three states the tone of foreign policy was set by revolutionary leaders who were either idealists or realists Idealists tended to take a more active and conflictual approach toward one or both of the superpowers while Realists were more cautious and less willing to resort to a conflictual posture This book also investigates the gap between the theoretical and practical nonalignment stance of each state This cross regional study provides policy analysts with clues about the foreign policies of other revolutionary developing countries in similar situations Finally it makes suggestions about how a Great Power may relate to a developing country during its first post revolution decade [Air University Library Index to Military Periodicals](#) ,1965 *Current Controversies in Virtue Theory* Mark Alfano,2015-02-11 Virtue is among the most venerable concepts in philosophy and has recently seen a major revival However new challenges to conceptions of virtue have also arisen In *Current Controversies in Virtue Theory* five pairs of cutting edge philosophers square off over central topics in virtue theory the nature of virtue the connection between virtue and flourishing the connection between moral and epistemic virtues the way in which virtues are acquired and the possibility of attaining virtue Mark Alfano guides his readers through these essays all published here for the first time with a synthetic introduction succinct abstracts of each debate suggested further readings and study questions for each controversy and a list of further controversies to be explored *Military Review* ,1967 **Power at Sea** Lisle A.
