Rituals and Deviant Sufi Mysticism in Ottoman Istanbul B. Deniz Calis-Kural, 2016-04-01 ehrenciz is an Ottoman genre of poetry written in honor of various cities and provincial towns of the Ottoman Empire from the early sixteenth century to the early eighteenth century This book examines the urban culture of Ottoman Istanbul through ehrenciz as the Ottoman space culture and traditions have been shaped by a constant struggle between conflicting groups practicing political and religious attitudes at odds By examining real and imaginary gardens landscapes and urban spaces and associated ritualized traditions the book questions the formation of Ottoman space culture in relation to practices of orthodox and heterodox Islamic practices and imperial politics The study proposes that ehrenciz was a subtext for secret rituals performed in city spaces carrying dissident ideals of Melami mysticism following after the ideals of the thirteenth century Sufi philosopher Ibn al Arabi who proposed a theory of creative imagination and a three tiered definition of space the ideal the real and the intermediary barzakh In these rituals marginal groups of guilds emphasized the autonomy of individual self and suggested a novel proposition that the city shall become an intermediary space for reconciling the orthodox and heterodox worlds In the early eighteenth century liminal expressions of these marginal groups gave rise to new urban rituals this time adopted by the

Ottoman court society and by affluent city dwellers and expressed in the poetry of Nedim. The author traces how a tradition that had its roots in the early sixteenth century as a marginal protest movement evolved until the early eighteenth century as a movement of urban space reform.

The Paradoxes of Modernity Zachary Simpson, 2022-05-10 A paradox lies at the heart of modernity: the simultaneous demand to create ideas to make us better humans and communities along with the contrary imperative that we criticize all ideals, especially the ones we have created. In philosophy, we see this paradox most acutely in figures like Immanuel Kant who states that we cannot know the essence of things and yet we must retain old ideas: God, freedom, and the soul in order to become better and more ethical humans. Or in Friedrich Nietzsche whose eternal recurrence, a self-created myth whose sole purpose is to get us to see the value in the everyday. This basic scheme of belief and unbelief is one of the fundamental elements of modernity, manifesting itself in the philosophies of Herbert Marcuse and Michel Foucault along with the theologies of Blaise Pascal, C.S. Lewis, William James, Sallie McFague, and Philip Clayton. How do we live out the values we know to be constructions? This question holds captive our ability to solve public goods problems and make our lives more meaningful. Instead of seeing this paradox of modernity as self-deception or bad faith, Zachary Simpson employs cognitive and social scientific research to explain how best to realize values that we know to be false through art, community, and ritual. In Simpson's account, the values we construct must conform to narrative, be reinforced through community, and habituated through ritual. And yet, modernity has also undermined collectivity and ritual. Thus arises the second paradox of modernity: the best tools we have for realizing values are those which devalue the individual modern subject. The last part of the book attempts to make three normative points regarding modernity. First, the modern individualist subject is insufficient to realize the very values and aspirations of modernity. We must recognize that humans are collective and communal. Second, we cannot simply create values; they must arise in communities and be realized through narrative and ritual. And third, if we are to live meaningful lives as contemporary meta-ethicists and positive psychologists argue, then such lives must include art, community, and ritual as a way to affirm and reinforce one's values. Let's Pretend is a statement about one of the dilemmas of the contemporary western world and how that dilemma is and might be resolved. How do we believe

in the values that we know will make a better world even if they are of our own making We must do so in part by becoming less modern by engaging with one another and imagining more The book should serve as both an essay in the history of Western thought as well as a constructive argument about the nature of the modern epoch and what resources we have to realize the central aspirations of modernity It aims to fill a critical lacuna in theoretical and philosophical approaches to modernity While most texts focus on either the need for created values or the need to remedy modern subjectivity few if any link the two problems together Moreover they do not ground their analyses in the social sciences and contemporary findings regarding the efficacy of narrative communal action and rituals The book is unique then because it asks a central question how do we believe in what we know to be false and because it answers this question using interdisciplinary methods that allow us to see the faultlines and paradoxes of our age

Ritual and Religion in the Xunzi T. C. Kline III, Justin

Tiwald, 2014-06-12 Xunzi a founding figure in the Confucian tradition is one of the world's great philosophers and theorists of religion For much of the last century his work has been seen largely as critical of religion particularly the popular beliefs and invocations of supernatural forces that underpin so many religious rituals Contributors to this volume challenge this view and offer a more sophisticated picture of Xunzi He emerges not as critic but rather as an adherent of religion who seeks to give religious practices meaning even though many religious beliefs are mistaken or self-serving Each essay offers a powerful illustration of Xunzi as both a religious devotee and as a philosopher of religion drawing on a wide array of disciplines and methodologies

David Knottnerus,2016-01-08 Up to now ritual has been under utilised for studying human behaviour This book narrows the gap in our understanding of the social causes and consequences of our actions by focusing on the ritualised behaviours that define much of our daily lives Knottnerus breaks new ground by comprehensively describing structural ritualistic theory He shows how structural reproduction has occurred throughout the world how rituals can be strategically used and how power can influence rituals and how the disruption and reconstitution of ritual is of crucial importance for human beings This book shows that ritual provides a missing link in sociology and helps us better explain the extreme complexity of human action and social reality
