Solutions for Sustainable Development Klára Szita Tóthné, Károly Jármay, Katalin Voith, 2019-09-19 The first International Conference on Engineering Solutions and Sustainable Development which is organized by the University of Miskolc Hungary is a significant and timely initiative creating the capacity of engineering students educators practicing engineers and industries to demonstrate values problem solving skills knowledge and attitude that are required to apply the principles of sustainable development throughout their professional career The aim of the ICESSD conference was creating an interdisciplinary platform for researchers and practitioners to present and discuss the most recent innovations trends and concerns as well as practical challenges encountered and solutions adopted in the fields of Technical and Environmental Science The conference covers the following topics Process Engineering Modelling and Optimisation Sustainable and Renewable Energy and Energy Engineering Waste Management and Reverse Logistics Environmental Management and Ecodesign Circular Economy and Life Cycle Approaches Smart Manufacturing and Smart Buildings Innovation and Efficiency Earth Science Academics scientists researchers and professionals from different countries and continents have contributed to this book

Research in Intelligent and Computing in Engineering Raghvendra Kumar, Nguyen Ho Quang, Vijender Kumar Solanki, Manuel Cardona, Prasant Kumar Pattnaik, 2021-01-04 This book comprises select peer reviewed proceedings of the international conference on Research in Intelligent and Computing in Engineering RICE 2020 held at Thu Dau Mot University Vietnam The volume primarily focuses on latest research and advances in various computing models such as centralized distributed cluster grid and cloud computing Practical examples and real life applications of wireless sensor networks mobile ad hoc networks and internet of things data mining and machine learning are also covered in the book The contents aim to enable researchers and professionals to tackle the rapidly growing needs of network applications and the various complexities associated with them

Mobile Robotics: Solutions And Challenges - Proceedings Of The Twelfth International Conference On Climbing And Walking Robots And The Support Technologies For Mobile Machines Mohammad Osman Tokhi, O Tosun, Gurvinder S Virk, H L Akin, 2009-08-26 This book provides state of the art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies The book contains peer reviewed articles presented at the CLAWAR 2008 conference Robots are no longer confined to industrial manufacturing environments with a great deal of interest being invested in the use of robots outside the factory environment The CLAWAR conference series established as a high profile international event acts as a platform for the dissemination of research and development findings and supports such a trend to address the current interest in mobile robotics in meeting the needs of mankind in various sectors of the society These include personal care public health and services in the domestic public and industrial environments The editors of the book have extensive research experience and publications in the area of robotics specifically in mobile robotics and their experience is reflected in the careful editing

of the contents in the book **Analysis and Control of Oilwell Drilling Vibrations** Martha Belem Saldivar Márquez, Islam Boussaada, Hugues Mounier, Silviu-Iulian Niculescu, 2015-03-09 This book reports the results of exhaustive research work on modeling and control of vertical oil well drilling systems It is focused on the analysis of the system dynamic response and the elimination of the most damaging drill string vibration modes affecting overall perforation performance stick slip torsional vibration and bit bounce axial vibration The text is organized in three parts The first part Modeling presents lumped and distributed parameter models that allow the dynamic behavior of the drill string to be characterized a comprehensive mathematical model taking into account mechanical and electric components of the overall drilling system is also provided The distributed nature of the system is accommodated by considering a system of wave equations subject to nonlinear boundary conditions this model is transformed into a pair of neutral type time delay equations which can overcome the complexity involved in the analysis and simulation of the partial differential equation model The second part Analysis is devoted to the study of the response of the system described by the time delay model important properties useful for analyzing system stability are investigated and frequency and time domain techniques are reviewed Part III Control concerns the design of stabilizing control laws aimed at eliminating undesirable drilling vibrations diverse control techniques based on infinite dimensional system representations are designed and evaluated The control proposals are shown to be effective in suppressing stick slip and bit bounce so that a considerable improvement of the overall drilling performance can be achieved This self contained book provides operational guidelines to avoid drilling vibrations Furthermore since the modeling and control techniques presented here can be generalized to treat diverse engineering problems it constitutes a useful resource to researchers working on control and its engineering application in oil well drilling Data-Centric AI Solutions and Emerging Technologies in the Healthcare Ecosystem Alex Khang, Geeta Rana, R. K. Tailor, Vugar Abdullayev, 2023-10-12 The book offers insight into the healthcare system by exploring emerging technologies and AI based applications and implementation strategies It includes current developments for future directions as well as covering the concept of the healthcare system along with its ecosystem Data Centric AI Solutions and Emerging Technologies in the Healthcare Ecosystem focuses on the mechanisms of proposing and incorporating solutions along with architectural concepts design principles smart solutions decision making process and intelligent predictions It offers state of the art approaches for overall innovations developments and implementation of the smart healthcare ecosystem and highlights medical signal and image processing algorithms healthcare based computer vision systems and discusses explainable AI XAI techniques for healthcare This book will be useful to researchers involved in AI IoT Data and emerging technologies in the medical industry It is also suitable as supporting material for undergraduate and graduate level courses in related engineering disciplines **Robot Motion and Control 2007** Krzysztof R. Kozlowski, 2009-06-10 Robot Motion Control 2007 presents very recent results in robot motion and control Forty one short papers have been chosen from those presented at the sixth International Workshop
