Coal and Rock Dynamic Disasters: Advances of Physical and Numerical Simulation in Monitoring, Early Warning, and Prevention - Volume II Jingjing Meng,Jia Lin,M. Younis Khan,Zhibo Zhang,2024-05-01 This Research Topic

is Volume II of a series The previous volume can be found here Coal and Rock Dynamic Disasters Advances of Physical and Numerical Simulation in Monitoring Early Warning and Prevention With the soaring growth of global population and socioeconomy energy consumption and demand has been rapidly rising and coal would still remain a fundamental energy source for a long time into the future Seeking deep coal resources becomes an inevitable trend due to the depletion of shallow coal resources Deep mining of coal resources promotes socioeconomic development whereas bringing a variety of security challenges In deep underground there is a significant risk increase in coal and rock dynamic disasters CRDDs owing to the changes in physical and mechanical properties of coal and rock In this regard it is of great importance and necessity to prevent and control CRDDs effectively and efficiently [Storage in Excavated Rock Caverns: Rockstore 77](#) Magnus Bergman,2013-10-02 Storage in Excavated Rock Caverns Rockstore 77 Volume 1 contains the proceedings of the First International Symposium on Storage in Excavated Rock Caverns held in Stockholm Sweden on September 5 8 1977 The symposium provided a forum for discussing subsurface storage in excavated rock caverns and tackled topics ranging from environmental demands to legislation and safety economic factors and experience from existing underground facilities Technical problems in conjunction with the design and construction of these large underground storage caverns are also considered Comprised of 33 chapters this volume begins by looking into the demand for subsurface storage The first chapter describes the initial and final screening criteria used to identify existing mine sites suitable for the storage of crude oil for the U S Strategic Petroleum Reserve Program The discussion then turns to Japan s primary energy supply underground hydrocarbon storage and considerations on their engineering features Subsequent chapters focus on the use of underground openings excavated in volcanic tuffs in the Cappodocia area in Turkey the economics of underground gas storage thermal energy storage in large underground systems and buildings and storage of additional heat in the use of heat pumps Underground storage in sewerage systems is also examined This monograph will be of interest to engineers contractors consultants government officials representatives of the oil and natural gas industry and others already involved in or planning to use cavern storage technology **Quantitative Structural Geology** David D. Pollard,Stephen J. Martel,2020-07-23 A pioneering single semester undergraduate textbook that balances descriptive and quantitative analysis of geological structures *Structural Geology* David D. Pollard,Stephen J. Martel,2020-07-23 Tackling structural geology problems today requires a quantitative understanding of the underlying physical principles and the ability to apply mathematical models to deformation processes within the Earth Accessible yet rigorous this unique textbook demonstrates how to approach structural geology quantitatively using calculus and mechanics and prepares students to interface with professional geophysicists and engineers who appreciate and utilize the same tools and computational methods to solve multidisciplinary problems Clearly explained methods are used throughout the book to quantify field data set up mathematical models for the formation of structures and compare model results to field observations An extensive online

package of coordinated laboratory exercises enables students to consolidate their learning and put it into practice by analyzing structural data and building insightful models Designed for single semester undergraduate courses this pioneering text prepares students for graduates studies and careers as professional geoscientists **Life, Vol. II: Evolution, Diversity and Ecology** David E.
