How to Enjoy Architecture Charles Holland, 2024-04-23 Charles Holland challenges us to look beyond the day to day familiarity of buildings to rediscover the pleasure of experiencing architecture Architecture is bound up with our daily lives but for most of us it is experienced as a blur of habit Our reactions towards the buildings that surround us are often culturally generated and we experience them in ways that are immediate but often mundane How to Enjoy Architecture A Guide for Everyone encourages us to move beyond this and instead really look at buildings Renowned architect Charles Holland talks about the buildings and architects that excite and inspire him and the ideas and principles through which we can engage with architecture By breaking buildings down into categories such as materials structure space and use Holland guides us

through drastically different styles and building types from the satisfying symmetry of a Queen Anne house to the thrill of a high tech tower or the social ideals that lie behind a housing estate In doing so he demonstrates how looking at experiencing and using architecture can bring joy in itself A book that will enrich any encounter with a building it made me want to look harder and be more curious We are led playfully through the fundamentals of architecture so that we might enjoy the details and the poetry of buildings all the more A walk through the city feels more fun and also more profound after reading this book Grayson Perry artist We so often encounter architecture when it goes wrong or offends us with its looks Holland though is the perfect clear headed tour guide to help us appreciate it with newly sharpened senses and fall in love again even those buildings we think we hate Tom Dyckhoff academic and broadcaster An enlightening and urbane exploration of architecture that resonates beyond conventional chronological histories Catherine Slessor architecture writer and critic

The Oxford History of British and Irish Catholicism, Volume II John Morrill,Liam Temple,2023-09-01 The second volume of The Oxford History of British Irish Catholicism traces the fortunes of Catholic communities in England Wales Scotland and Ireland across a period of great uncertainty and change From the outset of the Civil Wars in 1641 to the Jacobite rising of 1745 Catholics in the three kingdoms were varied in their responses to tumultuous events and tantalising opportunities The competing forces of dynamism and conservatism within these communities saw them constantly seeking to re situate or re imagine themselves as their relationship to the state to Protestantism to continental Europe as well as the wider world beyond changed and evolved Consciously transnational the volume moves away from insular conceptualisations of Catholicism and instead stresses connections with the European continent and beyond Early chapters give broad overviews of the experience of Catholics in the period tracking key events and important developments from 1641 to 1745 Chapters then address specific aspects of Catholicism including empire and overseas missions missionary activity devotion spirituality trade material culture music and architecture among others revealing a complex rich and varied history of Catholicism in the period

Architecture and Freedom Owen Hopkins,2018-05-29 Architects are facing a crisis of agency For decades they have seen their traditional role diminish in scope as more and more of their responsibilities have been taken over by other disciplines within the building construction industry Once upon a time we might have seen the architect as the conductor of the orchestra now he or she is but one cog in a vast and increasingly complex machine In an attempt to find a way out of this crisis there is growing debate about how architects might reassert the importance of their role and influence On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline s core mission of advancing social progress and promoting the public good and at the same time the scope of their traditional disciplinary remit At root this question is fundamentally about freedom about whether architects still possess it if they have ever done and whether it is possible to find the professional disciplinary and individual autonomy to be able to

define the spheres of their own practice Presenting a variety of views and perspectives this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century Contributors include Phillip Bernstein Peggy Deamer Adam Nathaniel Furman Kate Goodwin Charles Holland Anna Minton Patrik Schumacher Alex Scott Whitby Ines Weizman and Sarah Wigglesworth Featured architects Atelier Kite ScottWhitbyStudio C S Architects Anupama Kundoo Noero Architects Umbrellium and Zaha Hadid Architects
