

## Guide : Sage 300 ERP User Authorization Export

 **AccountingAdvice**

### **Sage 300 ERP User Authorization Export**

Authorization exports are a critical component of any ERP system. They allow users to authorize changes to their data and applications within the system, without having to physically access the systems. This guide will walk you through the steps required to export authorization data from Sage 300 ERP. We'll cover how to create an authorization export template, how to select the right data fields, and how to export the data in a format that is compatible with your ERP system. By following this guide, you'll be able to quickly and easily export authorization data for use in other applications. Read More-: [Sage 300 ERP User Authorization Export](#)

#### **What is Sage 300 ERP?**

Sage 300 ERP is an enterprise resource planning (ERP) software application for small and medium-sized businesses. It features a user authorization export function that allows you to export user permissions and roles from the ERP system into a spreadsheet or text file. This enables you to create a list of authorized users and assign specific permissions to each user. You can then use this information to manage user access in a centralized location.

#### **How to authorize users in Sage 300 ERP?**

In most cases, users in Sage 300 ERP should be authorized through the system's user management system. The following steps outline how to authorize users:

1. Log into the user management system and select Users from the menu on the left-hand side.
2. Select an individual user from the list of users and click on their name in the top right-hand corner of the screen.
3. On the User Authorization tab, you will see a list of permissions that have been assigned to this user. Click on the checkbox next to each permission that you want to authorize this user to have.
