Return-to-Play after Lower Limb Muscle Injury in Football Gian Nicola Bisciotti, Alessandro Corsini, Piero Volpi, 2021-10-18 Return to training RTT and return to play RTP decisions making process in football are currently based on expert's opinion. However, there are no consensus guidelines on evidence-based decision making. This book provides a framework for evidence-based decision making both in RTT and RTP following lower limb muscle injuries sustained in football. Based on the Italian Consensus Conference 2019 on return to play after lower limb muscle injury in football, it provides a list of RTT and RTP criteria after such injuries compiled by orthopedic surgeons, sports physicians, radiologists, rehabilitation physicians, sport physiologists, general surgeons, family physicians, physiotherapists, physical trainers, and psychologists working in elite football in Italy. The book identifies the main criteria for RTT and RTP following injuries involving the most important muscle groups: i.e. quadriceps, hamstring, hip adductor, hip external rotator, iliopsoas, and soleus/gastrocnemius. As such, it is a valuable reference resource for practitioners making RTT and RTP decisions making process.

The Superhuman Mind Berit Brogaard, PhD, Kristian Marlow, MA, 2015-08-25 Did you know your brain has superpowers? Berit Brogaard, PhD, and Kristian Marlow, MA, study people with astonishing talents: memory champions, human echolocators, musical virtuosos, math geniuses, and synesthetes who taste colors and hear faces. But as amazing as these abilities are, they are not mysterious. Our brains constantly process a huge amount of information below our awareness, and what these gifted individuals have in common is that through practice, injury, an innate brain disorder, or even more unusual circumstances, they have managed to gain a degree of conscious access to this potent processing power. *The Superhuman Mind* takes us inside the lives and brains of geniuses, savants, virtuosos, and a wide variety of ordinary people who have acquired truly extraordinary talents one way or another. Delving into the neurological underpinnings of these abilities, the authors even reveal how we can acquire some of them ourselves, from perfect pitch and lightning-fast math skills to supercharged creativity. *The Superhuman Mind* is a book full of the fascinating science readers look for from the likes of Oliver Sacks, combined with the exhilarating promise of *Moonwalking with Einstein*.

The objective of this volume is to provide a brief, easy to use but nonetheless comprehensive companion guide to *The Pathophysiology Basis of Nuclear Medicine* that will prove useful to undergraduates and postgraduates as well as to practitioners in clinical and research fields.

Concepts of Athletic Training Ronald P. Pfeiffer, Brent C. Mangus, Cynthia Trowbridge, 2014-03-19. Heavily revised and updated with the latest data from the field, the Seventh Edition of *Concepts of Athletic Training* focuses on the care and management of sport and activity related injuries while presenting key concepts in a comprehensive, logically sequential manner that will assist future professionals in making the correct decisions when confronted with an activity related injury or illness in their scope of practice. New to the Seventh Edition: An extensively revised and rewritten Chapter 3, *The Law of Sports Injury*, includes new material on the ethics of sports injury care and the role of the athletic trainer in risk assessment and liability. Chapter 4, *Sports Injury Prevention*, provides new material on training benefits of anaerobic fitness. Chapter 7, *Emergency Plan and Initial Injury Evaluation*, includes an expanded section on the assessment of the injured athlete's physical exam that urges coaches to collect as much information about the injury as well as the health history of the athlete. Chapter 13, *Injuries to the Thorax and Abdomen*, contains new sections on muscle strains and cardiac defects. Key Features include: New and revised What-if scenarios encourage students to work on critical decision making skills alone or in a group setting with role playing activities. Time Out boxes provide additional information related to the text such as NATA Athletic Helmet Removal Guidelines, how to recognize the signs of concussion and first aid for epilepsy. Athletic Trainers Speak Out boxes feature a different athletic trainer in every chapter who discusses an element of athlete care and injury prevention. Anatomy Reviews introduce body parts to students unfamiliar with human anatomy and acts as a refresher for those students with some anatomy background.
