COLLEGE PERSONAL STATEMENT ESSAY SAMPLE

I have always been fascinated by science and I have always been searching for the hidden meaning of things. The career I am about to follow is presumably due to a plastic toy microscope I received as gift when I was ten years old. I started wonder how arousing microbial life is, invisible to the human eye and somewhat comparable to stars: unattainable. When the time to select my career path has come, I had no doubts in applying for the biological sciences college.

The career of an undergraduate student is full of stimuli, especially when the passion fully matches with academic interests. I submerged in any subject finding interest even for philosophical ones such as bioethics. In particular for the debate behind some controversial genetic engineering applications. According with ethical guidelines, while respecting the human rights and biodiversity I decided to follow the genetic engineering master course.

In order to improve my open mind, I am about to be enrolled in an ERASMUS programme to complete the studies at ETH in Zurich, Switzerland. I am confident it will be a unique experience, I look forward to meet scientists and their job, I will face how be a researcher is for the very first time. When I will be back for the graduation I have to take a very important decision. I am aware how challenging science life can be and I will be applying for Ph.D. positions. I am sure I will be mature enough to make the right choice in terms of laboratory's topic and place. To my knowledge, the ETH in Zurich is one of the most prestigious research institute in Europe: the opportunity to join it will give me the wisdom to make the right career path selection.

Counseling 21st Century Students for Optimal College and Career Readiness Corine Fitzpatrick, Kathleen Costantini, 2012-03-27 In order for students to compete in today's global economy, our schools need to help them develop better cognitive and technological skills. School counselors have an enormous impact on students' achievement and their success in their post-secondary education, yet initiatives to improve student outcomes often overlook them. Fitzpatrick and Costantini present their own action-based curriculum for high school counselors that will meet the needs of 21st-century students, helping to foster their growth and ambition and actively engage them in learning what they need to succeed beyond high school. Important steps covered in this curriculum include: Making the transition to ninth grade successful; Using technology in the advising process, such as online resources for college and career research, assessing interests, and structuring advising sessions; Preparing for standardized testing and using it to motivate students about the college application process; Assisting students in researching careers and colleges; making the most of college visits; applying for college; and writing the application essay. Equally important, the book focuses on the counselor and his or her role as an advocate and leader for students and details running a guidance office, working with parents, and writing Secondary School Reports. While applicable for all school counselors and students, the authors' curriculum has a special focus on students in urban public schools to enable them to have the same experiences as their counterparts in suburban and private schools. Accompanying downloadable resources contain the tables, exercises, and charts from the book so they can be easily accessed and reproduced.
