The authors introduce the Prospect Center's Descriptive Review of Practice, a collaborative inquiry process that provides an opportunity for teachers to examine their practice and gain new perspectives from other participants. The contributors to this volume respond to each child's modes of thinking as they develop curriculum or find wiggle room in curricula they are given. By demonstrating how it is possible to pursue careful knowledge of craft, this book offers ways of teaching that allow for continuing growth and change. Book Features: An inquiry methodology that assists teachers to reflect on the classroom and develop curriculum that responds to children's interests and needs. Specific examples of a variety of sources teachers can draw on and think about to improve practice. A method of data collection that can inform practice while allowing for the unevenness, messiness, and essential humanness of teaching and learning. Making Space for Active Learning is a collection that stands alone and gets to the heart of what we mean by learning and teaching. Each contribution reminded me of how much I miss being in the classroom and how much we're missing in current, so-called school reform discourse. Keep this book handy.
