Confronting The Challenges Of The 21st Century - Proceedings Of The Forty-ninth Pugwash Conference On Science And World Affairs Joseph Rotblat,2001-10-29 In September 1999 scientists and scholars from around the world concerned with reducing the danger of armed conflict and seeking cooperative solutions to global problems met under the auspices of the Pugwash conferences the Nobel Prize winning organization The proceedings deal with a broad range of issues including a nuclear weapon free world emerging security threats development environment and international governance

Geo-economics and Power Politics in the 21st Century Mikael Wigell,Sören Scholvin,Mika Aaltola,2018-07-06 Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran s nuclear programme or Russia s annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today s globalised and highly interconnected world Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations As such it advances our understanding of geo economics as a strategic practice and as an innovative and timely analytical approach This book will be of much interest to students of security studies international political economy foreign policy and International Relations in general
