Directions: Read the passages, then compare and contrast them using the Venn diagram below.

MONEY BEES

Honey bees are about a half an inch long. They are yellow with brown stripes. Honey bees live in large groups all over the world. They are able to survive many years.

Honeybees make honey using pollen and nectar they collect. They store this honey in honeycombs in their hive. Honeybees mainly build their hives in trees, but they can also be found in chimneys and attics.

Honeybees can flap their wings 11,000 times a minute. This is what makes it sound like they are buzzing.

A honeybee can only sting once. Their stinger is shaped like a hook, so it tears out after they sting.

KILLER BEES

Africanized bees, nicknamed killer bees are about a half inch long. They are yellow with dark brown stripes. Killer bees live in Africa and the western and southern parts of the United States.

Killer bees live in small groups. The worker bees collect nectar and pollen to feed those in their group. These bees might live in trees, crates, boxes, or empty cans.

If a killer bee gets excited, it will chase someone for up to a mile. If this happens, run in a zig zag pattern and get indoors so you don't get stung. A killer bee's stinger is shaped like a hook, so if it stings you, it will rip out. Killer bees typically travel in groups, and their venom is more dangerous than a honey bee, so be very careful around them.
