Burkinshaw, 2015-11-30 The production of textile materials comprises a very large and complex global industry that utilises a diverse range of fibre types and creates a variety of textile products As the great majority of such products are coloured predominantly using aqueous dyeing processes the coloration of textiles is a large scale global business in which complex procedures are used to apply different types of dye to the various types of textile material The development of such dyeing processes is the result of substantial research activity undertaken over many decades into the physico chemical aspects of dye adsorption and the establishment of dyeing theory which seeks to describe the mechanism by which dyes interact with textile fibres Physico Chemical Aspects of Textile Coloration provides a comprehensive treatment of the physical chemistry involved in the dyeing of the major types of natural man made and synthetic fibres with the principal types of dye The book

covers fundamental aspects of the physical and chemical structure of both fibres and dyes together with the structure and properties of water in relation to dyeing dyeing as an area of study as well as the terminology employed in dyeing technology and science contemporary views of intermolecular forces and the nature of the interactions that can occur between dyes and fibres at a molecular level fundamental principles involved in dyeing theory as represented by the thermodynamics and kinetics of dye sorption detailed accounts of the mechanism of dyeing that applies to cotton and other cellulosic fibres polyester polyamide wool polyacrylonitrile and silk fibres non aqueous dyeing as represented by the use of air organic solvents and supercritical CO<sub>2</sub> fluid as alternatives to water as application medium The up to date text is supported by a large number of tables figures and illustrations as well as footnotes and widespread use of references to published work The book is essential reading for students teachers researchers and professionals involved in textile coloration

**Pedagogical Cases in Physical Education and Youth Sport** Kathleen Armour, 2014-01-21 Pedagogical Cases in Physical Education and Youth Sport is a completely new kind of resource for students and practitioners working in physical education or youth sport The book consists of 20 richly described cases of individual young learners each written by a team of authors with diverse expertise from across the sport exercise and movement sciences These cases bring together knowledge from single sub disciplines into new interdisciplinary knowledge to inform best practice in physical education teaching and coaching in youth sport settings At the heart of each case is an individual young person of a specified age and gender with a range of physical social and psychological characteristics Drawing on current research theory and empirical data from their own specialist discipline each chapter author identifies the key factors they feel should be taken into account when attempting to teach or coach the young person described These strands are then drawn together at the end of each chapter and linked to current research from the sport pedagogy literature to highlight the implications for planning and evaluating teaching or coaching sessions No other book offers such a rich vivid and thought provoking set of pedagogical tools for understanding and working with children and young people in sport This is an essential resource for any student on a physical education coaching kinesiology or sport science course and for any teacher coach or instructor working in physical education or youth sport

**Eco-design in Electrical Engineering** Jean-Luc Bessède,2017-08-20 This book addresses eco design a major tool for reducing the environmental impacts of products services and systems in the context of sustainable development It covers four key aspects of eco design applied to electrical engineering First it describes current and future methodologies and standards including regulations which apply to electrical engineering In turn the second chapter is devoted to energy systems and planning including constraints on the insertion of equipment into the grid Components such as transformers and cables their eco design characteristics and impacts and their potential to improve the environmental

impacts of networks are described in the third chapter. Lastly, the fourth chapter deals with materials in terms of their performance and ecological impact. In the case of electrical equipment, the eco design approach is also connected to the development of renewable energies and energy efficiency.

Teaching Science Thinking Christopher Moore, 2018-11-08

Teach your students how to think like scientists. This book shows you practical ways to incorporate science thinking in your classroom using simple Thinking Tasks that you can insert into any lesson. What is science thinking and how can you possibly teach and assess it? How is science thinking incorporated into the Next Generation Science Standards (NGSS) and how can it be weaved into your curriculum? This book answers these questions. This practical book provides a clear, research-verified framework for helping students develop scientific thinking as required by the NGSS. Your students will not be memorizing content but will become engaged in the real work scientists do using critical thinking patterns such as Recognizing patterns, Inventing new hypotheses based on observations, Separating causes from correlations, Determining relevant variables and isolating them, Testing hypotheses, and Thinking about their own thinking and the relative value of evidence. The book includes a variety of sample classroom activities and rubrics as well as frameworks for creating your own tools. Designed for the busy teacher, this book also shows you quick and simple ways to add deep science thinking to existing lessons.

*The Extinction of Experience* Christine Rosen, 2024-09-10

An Esquire Best Book of 2024. A reflective original invitation to recover and cultivate the human experiences that have atrophied in our virtual world. We embraced the mediated life from Facetune and Venmo to meme culture and the Metaverse because these technologies offer novelty and convenience. But they also transform our sense of self and warp the boundaries between virtual and real. What are the costs? Who are we in a disembodied world? In *The Extinction of Experience*, Christine Rosen investigates the cultural and emotional shifts that accompany our embrace of technology. In warm philosophical prose, Rosen reveals key human experiences at risk of going extinct, including face-to-face communication, sense of place, authentic emotion, and even boredom. Considering cultural trends like TikTok challenges and mukbang, and politically unsettling phenomena like sociometric trackers and online conspiracy culture, Rosen exposes an unprecedented shift in the human condition, one that habituates us to alienation and control. To recover our humanity and come back to the real world, we must reclaim serendipity, community, patience, and risk.

Application of Visual Data in K-16 Science Classrooms Kevin D. Finson, Jon Pedersen, 2015-03-01

This book examines visual data use with students PK-16 as well as in pre-service and in-service science teacher preparation. Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author's discussion and explanation about the targeted visual data as applied by the author in his/her classroom use of visual data as a diagnostic tool, its use as an assessment tool, and discussion of implications for science teaching and/or science teacher preparation. Although the body of research and practice in this field is growing, there remains a gap in the literature about clearly explicating the use of visual data in the science classroom. A growing body of literature

discusses what visual data are although this topic is still viewed as being at the beginning of its development in educators thinking and there are some scattered examples of studies exploring the use of visual data in science classrooms although those studies have not necessarily clearly identified their foci as visual data per se As interest and attention has become more focused on visual data a logical progression of questioning has been how visual data are actually applied in the science classroom whether it be early elementary college or somewhere in between Visual data applications of interest to the science education community include how it is identified how it can be used with students and how students can generate it themselves how it can be employed as a diagnostic tool in concept development and how it can be utilized as an assessment tool This book explores that as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction *Handbook of Research on Learning Outcomes and Opportunities in the Digital Age* Wang, Viktor, 2015-12-22 Education and learning opportunities bring about the potential for individual and national advancement As learners move away from traditional scholarly media and toward technology based education students gain an advantage with technology in learning about their world and how to interact with modern society The Handbook of Research on Learning Outcomes and Opportunities in the Digital Age provides expert research relating to recent technological advancements technology and learning assessments and the effects of technology on learning environments making it a crucial reference source for researchers scholars and professors in various fields
