Statistics Robin H. Lock, Patti Frazer Lock, Kari Lock Morgan, Eric F. Lock, Dennis F. Lock, 2020-10-13 Statistics Unlocking the Power of Data 3rd Edition is designed for an introductory statistics course focusing on data analysis with real world applications. Students use simulation methods to effectively collect, analyze, and interpret data to draw conclusions. Randomization and bootstrap interval methods introduce the fundamentals of statistical inference, bringing concepts to life through authentically relevant examples. More traditional methods like t tests, chi square tests, etc. are introduced after students have developed a strong intuitive understanding of inference through randomization methods. While any popular statistical software package may be used, the authors have created StatKey to perform simulations using data sets and examples from the text. A variety of videos, activities, and a modular chapter on probability are adaptable to many classroom formats and approaches.

Understanding Basic Statistics Charles Henry Brase, Corrinne Pellillo Brase, 2001. Using Technology Sections featuring a variety of data for analysis using a computer software program or a graphing calculator include screen displays from Minitab and the TI 83 calculator.
