Crawford, 2013-08-08 The medieval earldoms of Orkney and Caithness were positioned between two worlds the Norwegian and the Scottish They were a maritime lordship divided or united by the turbulent waters of the Pentland Firth This unlikely combination of island and mainland territory survived as a single lordship for 600 years against the odds Growing out of the Viking maelstrom of the early Middle Ages it became an established and wealthy principality which dominated northern waters with a renowned dynasty of earls Despite their peripheral location these earls were fully in touch with the kingdoms of Norway and Scotland and increasingly subject to the rulers of these kingdoms How they maintained their independence and how they survived the clash of loyalties are themes explored in this book from the early Viking age to the late medieval era when the powerful feudal Sinclair earls ruled the islands and regained possession of Caithness This is a story of the time when the Northern Isles of Scotland were part of a different national entity which explains the background to the non Gaelic culture of this locality when links across the North Sea were as important as links with the kingdom of Scotland to the south Catalogue Bernard Quaritch (Firm), 1903 **Catalogue of the Icelandic Collection Bequeathed by Willard Fiske** Cornell University Library (Ithaca), 1914 The Saga of King Sverri of Norway Karl Jónsson, 1899 **The Sociology of Hypocrisy** Stephen G. Violence and Risk in Medieval Iceland Oren Falk, 2021-03-25 Historians spend a lot of time thinking about violence bloodshed and feats of heroism punctuate practically every narration of the past Yet historians have been slow to subject violence itself to conceptual analysis What aspects of the past do we designate violent To what methodological assumptions do we commit ourselves when we employ this term How may we approach the category violence in a specifically historical way and what is it that we explain when we write its history Astonishingly such questions are seldom even voiced much less debated in the historical literature **Violence and Risk in Medieval Iceland** This *Spattered Isle* lays out a cultural history model for understanding violence Using interdisciplinary tools it argues that violence is a positively constructed asset deployed along three principal axes power signification and risk Analysing violence in instrumental terms as an attempt to coerce others focuses on power Analysing it in symbolic terms as an attempt to communicate meanings focuses on signification Finally analysing it in cognitive terms as an attempt to exercise agency despite imperfect control over circumstances focuses on risk **Violence and Risk in Medieval Iceland** explores a place and time notorious for its rampant violence Iceland's famous sagas hold treasure troves of circumstantial data ideally suited for past tense ethnography yet demand that the reader come up with subtle and innovative methodologies for recovering histories from their stories The sagas throw into sharp relief the kinds of analytic insights we obtain through cultural interpretation offering lessons that apply to other epochs too

The Cambridge Bibliography of English Literature Frederick Wilse Bateson, 1940 *Iron Age Myth and Materiality* Lotte Hedeager, 2011-04-29 *Iron Age Myth and Materiality* an Archaeology of Scandinavia AD 400 1000 considers the relationship between myth and materiality in Scandinavia from the beginning of the post Roman era and the European Migrations up until the coming of Christianity It pursues an interdisciplinary interpretation of text and material culture and examines how the documentation of an oral past relates to its material embodiment While the material evidence is from the Iron Age most Old Norse texts were written down in the thirteenth century or even later With a time lag of 300 to 900 years from the archaeological evidence the textual material has until recently been ruled out as a usable source for any study of the pagan past However Hedeager argues that this is true regarding any study of a society s short term history but it should not be the crucial requirement for defining the sources relevant for studying long term structures of the longue dur e or their potential contributions to a theoretical understanding of cultural changes and transformation In Iron Age Scandinavia we are dealing with persistent and slow changing structures of worldviews and ideologies over a wavelength of nearly a millennium Furthermore iconography can often date the arrival of new mythical themes anchoring written narratives in a much older archaeological context Old Norse myths are explored with particular attention to one of the central mythical narratives of the Old Norse canon the mythic cycle of Odin king of the Norse pantheon In addition contemporaneous historical sources from late Antiquity and the early European Middle Age the narratives of Jordanes Gregory of Tours and Paul the Deacon in particular will be explored No other study provides such a broad ranging and authoritative study of the relationship of myth to the archaeology of Scandinavia
