

Tiny Homes

Over the past 70 to 80 years, the household lifestyles of middle class Americans have been getting increasingly more extravagant. In 1949, the average size of a single-family home was 909 square feet. By 2021, the average size of an American single family home had reached 2,480 square feet! Not only do some people find the size of these homes excessive; for many they are also unaffordable. For most people, purchasing a home in America today comes with a mountain of debt, a sinkhole of interest, and at least 30 years of working to pay for it all, often in a job that homeowner doesn't even really want to be doing. One form of resistance against this lifestyle which began in the 1970s has become known as the Tiny House Movement.

A tiny house is a dwelling space that averages between 160 and 200 square feet. Tiny houses are small enough and light enough to be towed by a pickup truck, yet they still contain areas for cooking, living, and sleeping, as well as a bathroom. Today, singles, couples, and even families call tiny houses their home.

They not only have the advantage of being portable. They are also significantly less expensive than a conventional single family home. Depending on how handy you are with construction and the availability of materials, a tiny house can be built for as little as \$8,000, though they typically cost the new homeowner between \$30,000 and \$60,000. But even \$60,000 is a fraction of what people are paying for single family real estate in many areas of the country.

The decision to go tiny requires some radical self-evaluation. What do people really need to live comfortably? In many areas of the world, people still live far simpler lives than those lived by Americans, who are continually assaulted on television, radio, and social media with advertisements designed to make them think they need more and more personal belongings to be happy. In reality, the basic needs of a human

, 1997 **Literature and Ethics in High School English Classes** Ross Collin, 2024-11-14 This book offers a defence of ethical reading in secondary school English classes at a time when reformers and policy makers are trying to reorganize English language arts around technical skills or politics Ross Collin shows how students and teachers use literature as a venue for exploring their own and others ethical ideas and practices and argues that moral inquiry in English class is a distinctly social endeavour The book draws ideas from English education and moral philosophy From English education Collin explores social reading or what Louise Rosenblatt named transaction looking at texts commonly taught in secondary

school English including Shakespeare's *Romeo and Juliet* and Jacqueline Woodson's *Brown Girl Dreaming*. From philosophy he draws on arguments about moral vision and literature developed by Iris Murdoch, Martha Nussbaum, and Nora H. Miller, and develops ideas tacit in English education about reading with moral vision. He concludes by proposing a new theory of moral vision in transactional reading.

Making a Difference: Volume I and II Sasha A. Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T. Hickey, 2017-09-05 William Wordsworth 1770-1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally. This broad-ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period. It discusses many of Wordsworth's later poems, comparing his work with that of his regional contemporaries as well as major writers such as Scott. The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships. A serious discussion of the place of sexual feeling in his writing is also included.
