This well constructed book provides practical advice and information that will help organizations to understand how to design and develop a service catalog and to understand the role that the service catalog performs within the service portfolio. Readers will gain practical information and knowledge that will help with understanding the full concept of the service catalog, understanding the scope of the service catalog, building an appropriate service catalog for your organization, identifying the true value that the service catalog can deliver to your organization, understanding services and the value that they provide to your organization and customers, managing the service catalog. In addition, a complete service catalog schematic is provided and the service portfolio pyramid, which is unique to this book, is introduced showing how all the pieces of the puzzle fit together. Widely researched and reviewed by some of the world's leading experts, this book provides a down to earth and practical resource for not only those who are developing Service Catalogs for the first time but also for those looking to refine their services according to agreed and established best practice concepts. *Patterns for API Design* Olaf Zimmermann, Mirko Stocker, Daniel Lubke, Uwe Zdun, Cesare Pautasso, 2022-12-05 Proven Patterns for Designing Evolvable High Quality APIs For Any Domain Technology or Platform APIs enable breakthrough innovation and digital transformation in organizations and ecosystems of all kinds.
