Plantation Lincoln Addison,2019-08-15 South African agriculture is characterized by growing labour unrest evinced in recent years by high profile strikes but little is known about the sources and forms of day to day struggle In Chiefs of the Plantation Lincoln Addison examines how labour conflict is fuelled by changing management practices and how workers respond and resist across spatial sexual and spiritual domains Depicting in rich ethnographic detail daily life on a plantation

Addison describes how agriculture has been restructured in the post apartheid era through a delegation of authority from white landowners to black intermediaries He explains that while this labour regime enables the profitability of plantations it gives rise to a fragile moral economy in which perceptions of what is tolerable and what is exploitation frequently clash In this environment transactional sex and Christian worship emerge as important terrains of gendered and spiritual contestation where women and low ranking workers remain resilient in the face of unequal power relations Meanwhile plantations project an appearance of benevolent paternalism particularly in the narratives and self identity of white landowners This book reveals how in the everyday life of the community both the plantation and the compound where the workers live serve as central grounds for the negotiation of labour relations A groundbreaking study that uncovers how migrant plantation workers challenge their exploitation Chiefs of the Plantation is a rare glimpse into the often hidden world of labour struggle on contemporary plantations

AIDS in the World II Global AIDS Policy Coalition, 1996 *AIDS in the World Vol 1* published in 1992 was the first full analysis of mankind's global confrontation with this disease. The AIDS scene, however, has been changing so rapidly that the need for a second volume was felt much earlier than expected. In *AIDS in the World II*, the authors extend the international comparisons from 38 countries to the entire world and show that the AIDS pandemic has become increasingly fragmented within the world population. They present data that takes the discussion beyond the current understanding of the vulnerability of nations and communities to the worldwide spread of HIV, engaging in a detailed exploration of the social strategies that have enabled individuals to avoid infection. Mann and Tarantola chart a course into the future based on an incisive investigation of the global pandemic and response, the crucial lessons learned from the first decade and their expert understanding of the scientific and social

dimensions of the HIV challenge The authors explain how the variety of reactions to the pandemic has contributed to a more advanced awareness of our vulnerability to HIV AIDS and offer a blueprint for an expanded global prevention effort Intended to serve the information needs of all professionals involved in AIDS research and care this volume s accessibility and clarity of writing make it highly suitable for the general reader as well
