O Level Grade Boundaries 2013:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do *Reshaping the University* David Palfreyman, Ted Tapper, 2014 The global economic crisis has required governments across the globe to reconsider their spending priorities It is within this demanding economic context that higher education systems have been steadily restructured with in many ways the English model in the vanguard of change This book focuses in particular upon the policy of removing almost entirely public support for the payment of student fees This has emerged from a steady process of change which has broad political support and is underwritten by the idea that higher education is now seen more as a private than a public good As this shift has occurred not a new innovation but rather a return to what once prevailed as more of a market in English higher education so the relationship between government and the higher education has evolved with the latter now attempting to steer the development of the system through a state regulated market The book has a strong comparative dimension that draws upon US higher education to illustrate both the possible advantages and potential hazards to the marketization strategy It concludes that any such strategy needs to be accompanied by state regulation if it is to function effectively particularly to stimulate price competition encourage innovation from new entrants and provide consumer protection for students paying high fees *The Coalition Effect, 2010-2015* Anthony Seldon, Mike Finn, Ilias Thoms, 2015-03-26 The essential verdict on Britain's first coalition government since the Second World War delivered by an unrivalled team of experts **Education System Design** Brian Hudson, Marilyn Leask, Sarah Younie, 2020-11-26 This book highlights decisions governments have to make about their public education systems the options they have before them and the consequences of their decisions As well as covering issues such as values curriculum teacher training structures and so on the book addresses education planning for epidemics pandemics

and disasters Education systems provide the foundations for the future wellbeing of every society yet existing systems are a point of global concern Education System Design is a response to debates in developing and developed countries about the characteristics of a high quality national education service It questions what makes a successful system of education With chapters that draw on experience in education systems around the world each one considers an element of a national education service and its role in providing a coherent and connected set of structures to ensure good education for all members of society Key topics include Existing education systems and what a future system might look like Inclusion and social justice Leadership and teacher education Policy options and the consequences of policy changes This book suggests an education system be viewed as an ecosystem with interdependencies between many different components needing to be considered when change is contemplated It is a vital book for any stakeholders in educational systems including students teachers and senior leaders It would be particularly useful to policy makers and those implementing policy changes

Greater Expectations: Enabling Achievement for Disadvantaged Students Ian Warwick, Alex Crossman, 2024-02-23 How can greater expectations lead to greater outcomes for schools and the students they teach The London Academy of Excellence LAE Newham is one of the leading sixth form schools in the UK The LAE's mission is to combat disadvantage by providing ambitious young people from lower income homes with an education on a par with the best available in the independent sector In its first decade the LAE sent over 1 300 students to Russell Group universities over 200 to medical schools and more than 150 to Oxford or Cambridge Most of those students were the first in their family to attend a university The authors sift through the school's practices to reveal universal concepts and ideas that school leaders in any context can consider for their own schools These ideas include Understanding the curriculum as a source of social mobility Planning for high quality destinations from first contact with prospective students Exploring challenge

strategies to achieve academic excellence across subjects The book culminates in a list of strategies that can drive greater expectations in any school Alex Crossman is Headteacher and Ian Warwick is Chair of the Education Committee at the London Academy of Excellence TMS 2013 142nd Annual Meeting and Exhibition The Minerals, Metals & Materials Society (TMS),2013-02-22 Presenting papers from the 2013 annual meeting of The Minerals Metals Materials Society TMS this volume covers developments in all aspects of high temperature electrochemistry from the fundamental to the empirical and from the theoretical to the applied **Assessment in Education** Shelleyann Scott,Donald E. Scott,Charles F. Webber,2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice Given the highly politicised nature of assessment it addresses leaders and aspiring leaders who are open to being challenged willing to explore controversy and capable of engaging in informed critical discourse The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice Collectively the chapters highlight important assessment purposes and models including intended and unintended effects of assessment in a globalised context The book provides opportunities to explore cultural similarities and particularities It invites readers to challenge taken for granted assumptions about ourselves and colleagues in other settings The chapters highlight the cultural clashes that may occur when cross cultural borrowing of assessment strategies policies and tools takes place However authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems Readers will encounter challenges from authors to deconstruct their assessment values beliefs and preconceptions Indeed one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance
