delectable aroma of one freshly baked loaf after another *Introduction to Baking No-Knead Bread in Bread Pans (Plus...
Guide to Bread Pans)* Steve Gamelin,2014-07-11 The 1 baking vessel for bread is the bread pan The most common baking
vessel for no knead bread is the Dutch oven The time has come to develop a no knead recipe with ingredients and baking
temperature times specifically designed for the bread pan The results were so good I now make over halves my loaves in the
bread pan The traditional no knead recipe was designed to baking bread in a preheated Dutch oven with a lid to capture
steam for crust development but when you bake in the open oven there are different dynamics This cookbook is about the
bread pan and how bake no knead bread in a bread pan I started by evaluating 4 different sizes quantity of ingredients and
bake time are different for each size Then I evaluated a variety of different types of bread pans 4 metal 1 bakersware 3 cast
iron 1 glass 2 stoneware 1 natural stoneware The goal was to design a recipe that would give consistent results Then I took
my 11 most popular recipes ingredients and adapted them to the bread pan method Bottom line I have a process for making
5 loaves at a time I can make one batch then put a loaf in 5 different bread pans and they will all have an internal of 200
degrees F And that s what makes this cookbook different from any other cookbook on the market This cookbook includes
