Moran, American Meteorological Society. Education Program, United States. National Oceanic and Atmospheric Administration, 2009     **Fluorescence Methods for Investigation of Living Cells and Microorganisms** Natalia Grigoryeva, 2020-09 Fluorescence methods play a leading role in the investigation of biological objects They are the only non destructive methods for investigating living cells and microorganisms in vivo Using intrinsic and artificial fluorescence methods provides deep insight into mechanisms underlying physiological and biochemical processes This book covers a wide range of modern methods involved in experimental biology It illustrates the use of fluorescence microscopy and spectroscopy confocal laser scanning microscopy flow cytometry delayed fluorescence pulse amplitude modulation fluorometry and fluorescent dye staining protocols This book provides an overview of practical and theoretical aspects of fluorescence methods and their successful application in the investigation of static and dynamic processes in living cells and microorganisms     **The Ocean in Motion** Manuel G. Velarde, Roman Yu. Tarakanov, Alexey V. Marchenko, 2018-03-28 This book commemorates the 70th birthday of Eugene Morozov the noted Russian observational oceanographer It contains many contributions reflecting his fields of interest including but not limited to tidal internal waves ocean circulation deep ocean currents and Arctic oceanography Special attention is paid to studies on internal waves and especially those on tidal internal waves in the Global Ocean These papers describe the most important open problems concerning experimental studies of internal waves and their theoretical numerical and laboratory modeling Further contributions investigate the physics of surface waves and their interaction with internal waves Here the focus is on describing interaction processes between internal waves and deep currents in the ocean especially currents of Antarctic Bottom Water in abyssal fractures They also touch on the problem of oceanic circulation and related processes in fjords including those occurring under sea ice Given its breadth of coverage the book will appeal to anyone interested in a survey of ocean dynamics ranging from historic perspectives to modern research topics     UNEP Year Book 2011 , 2011 The 8th Edition of the UN Environment Programme flagship report The UNEP Year Book 2011 examines global emerging issues and provides the latest environmental science it also highlights major environmental events and developments over the past year and presents the most recent data and indicator trends The ocean has become a global repository for much of the waste we produce Scientists are concerned that plastic debris in the ocean can transport toxic substances which may end up in the food chain causing potential harm to ecosystems and human health The Year Book also explores the wider implications of the use of phosphorus in food production Phosphorus is an essential nutrient whose supply is limited Since demand for fertilizer in agriculture rocketed in the 20th century large amounts of phosphorus are flowing into the environment New perspectives

are also emerging on how biodiversity conservation can be integrated in forest management Forests are receiving increasing attention not least because of their role in climate change mitigation Halting loss of forest biodiversity is essential if forests are to adapt to mounting pressures including climate change and pest outbreaks The Year Book s overview of events and developments during 2010 shows how cutting edge science reveals new opportunities to mitigate climate change while improving air quality Stimulated by technological innovation and green investments renewable energy supply is growing rapidly This and other developments are summarized in key environmental indicators that present the latest data and trends For The global environment

Oceans Guy Jacques,Paul Tréguer,Herlé Mercier,2021-03-05 Since the HMS Challenger expedition of 1872 1876 our vision of the ocean has changed completely We now understand that it plays a key role in biodiversity climate regulation and mineral and biological resources and as such the ocean is a major service provider for humanity Oceans draws on data from new oceanographic and satellite tools acquired through international interdisciplinary programs It describes the processes that control how the ocean functions on different spatial and temporal scales After considering the evolution of concepts in physical chemical and biological oceanography the book outlines the future of a warmer acidified less oxygenated ocean It shows how a view of the ocean at different scales changes how we understand it Finally the book presents the challenges facing the ocean in terms of the exploitation of biological and mineral resources in the context of sustainable development and the regulation of climate change

**Geophysics and Ocean Waves Studies** Khalid S. Essa,Marcello Di Risio,Daniele Celli,Davide Pasquali,2021-03-17 The book Geophysics and Ocean Waves Studies presents the collected chapters in two sections named Geophysics and Ocean Waves Studies The first section Geophysics provides a thorough overview of using different geophysical methods including gravity self potential and EM in exploration Moreover it shows the significance of rock physics properties and enhanced oil recovery phases during oil reservoir production The second section Ocean Waves Studies is intended to provide the reader with a strong description of the latest developments in the physical and numerical description of wind generated and long waves including some new features discovered in the last few years The section is organized with the aim to introduce the reader from offshore to nearshore phenomena including a description of wave dissipation and large scale phenomena i e storm surges and landslide induced tsunamis This book shall be of great interest to students scientists geologists geophysicists and the investment community
