Vraga,2020-06-29 This book highlights the diverse methods needed to study a complex media environment and the nuance and richness of the understanding gained by doing so by offering examples of political communication research considering multiple platforms simultaneously Political communication research that considers multiple media platforms is difficult and expensive to perform and therefore relatively rare Yet studying media platforms in isolation ignores the realities of the varied and complicated contemporary media experience where most individuals consume information from multiple media outlets Media platforms from traditional outlets such as newspapers and television to newer online platforms such as social media have proliferated in recent years This makes the media environment itself more complex as classic understandings of how the media function give way to a growing recognition of the hybrid media system where divisions between content and producers are opaque and where information is gleaned from increasingly diverse and numerous sources Studying political communication across platforms allows better understanding of which types of experiences and effects are universal and which are specific to particular platforms This book was originally published as a special issue of *Political Communication* *Richard Dawkins: The Pope of Unreason* Mike Hockney,2014-12-19 A book attacking the ideology of Richard Dawkins is invariably assumed to be a defence of religious faith Nothing could be further from the truth in this case This book equates faith with insanity Instead it argues that we live in the hyperrational reality of ontological mathematics We attack the scientific dogma of Dawkins and his fellow travellers for being incompatible with ontological mathematics and in fact constituting a quasi religious hence mad faith in empiricism materialism randomness and meaninglessness nihilism all of which are refuted by ontological mathematics which reflects the principle of sufficient reason Are you rational enough for the truth Are you intelligent enough to be an ontological

A Century of Compulsory Voting in Australia Matteo Bonotti, Paul Strangio, 2021-03-13 Compulsory voting has operated in Australia for a century and remains the best known and arguably the most successful example of the practice globally By probing that experience from several disciplinary perspectives this book offers a fresh up to date insight into the development and distinctive functioning of compulsory voting in Australia By juxtaposing the Australian experience with that of other representative democracies in Europe and North America the volume also offers a much needed comparative dimension to compulsory voting in Australia A unifying theme running through this study is the relationship between compulsory voting and democratic well being Can we learn anything from Australia s experience of the practice that is instructive for the development of institutional bulwarks in an era when democratic politics is under pressure globally Or is Australia s case sui generis best understood in the final analysis as an intriguing outlier
