**Dear Ms. Hatfield,**

I am writing on behalf of **[Your Company Name]**, a non-profit organization that is dedicated to improving the lives of those less privileged through various initiatives. We have realized through our work that we cannot make a significant impact without the combined efforts of benevolent individuals like yourself. This year, we plan on launching a new initiative that aims to provide education resources for children in impoverished areas.

Our passion lies in making quality education accessible for every child, irrespective of their socio-economic background. However, to successfully implement this project, we require financial aid. Indeed, the task ahead is enormous, but we firmly believe that with your kind support, it is achievable. As such, we cordially invite you to contribute to this initiative.

Any amount of donation that you can make would go a long way in making a difference in these children's lives.

Oppenheimer,Christopher Y. Olivola,2011-01-19 Americans donate over 300 billion dollars a year to charity but the psychological factors that govern whether to give and how much to give are still not well understood Our understanding of charitable giving is based primarily upon the intuitions of fundraisers or correlational data which cannot establish causal relationships By contrast the chapters in this book study charity using experimental methods in which the variables of interest are experimentally manipulated As a result it becomes possible to identify the causal factors that underlie giving and to design effective intervention programs that can help increase the likelihood and amount that people contribute to a cause For charitable organizations this book examines the efficacy of fundraising

strategies commonly used by nonprofits and makes concrete recommendations about how to make capital campaigns more efficient and effective. Moreover, a number of novel factors that influence giving are identified and explored, opening the door to exciting new avenues in fundraising. For researchers, this book breaks novel theoretical ground in our understanding of how charitable decisions are made. While the chapters focus on applications to charity, the emotional, social, and cognitive mechanisms explored herein all have more general implications for the study of psychology and behavioral economics. This book highlights some of the most intriguing, surprising, and enlightening experimental studies on the topic of donation behavior, opening up exciting pathways to cross-cutting the divide between theory and practice.
