Writing an expository essay outline
In order to create a profession expository essay it is necessary to follow three golden rules:

1. The statements taken from **different articles** must be **clearly stated** in the essay and
   the development of this statement in the essay should not be different from its
   development in the original article. Therefore no "meaning deformations" will occur,
   but the main point of the original article will be emphasized.

2. The analysed event of situation should be review from the position of several sources
   thus making the expository essay stay focused on the context and very objective.

3. The conclusions in an expository essay should never be a surprise for the reader as they
   need to be easily traced throughout the essay. The analysis and the conclusions have
   to be always connected to each other. The reader should **never have to guess** what the
   author meant and never have a problem following the essay's reasoning.

Expository essay Structure
A proper structure of an expository essay is a way to make it as effective as possible.

1. A narrow topic is presented
2. A thesis statement must express the main essence of the essay
3. The topic is developed through different opinions
4. The conclusion is made according to the summary of the presented above opinions

Expository essay format
The expository essay format implies some vital specifications:

1. The paragraphs supporting the thesis statement are supposed to have one main topic-
   line. The rest of the sentences are to be directly related to this topic-line. This makes it
   easier for the reader to trace the logical movement of the essay.
2. Conclusion is a place of logical end of the essay analysis but not for nay type of new
   information.
3. The conclusion in an expository essay always restates the thesis sentence and supports
   the main topic-line of the essay. The ending must be memorable.
