Decentralization, Local Governance, and Localizing the Sustainable Development Goals in Asia and the Pacific Bruno Carrasco, Hanif A. Rahemtulla, Rainer Rohdewohld, 2022-10-12. Since its adoption in 2015, the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development. In tandem with other global agendas adopted that year such as the Paris Agreement on Climate Change and UN Habitat's New Urban Agenda, it remains the global and regional blueprint for sustainable development despite the COVID-19 pandemic. The term 'localizing the Sustainable Development Goals' (SDGs) has been used to capture the importance of subnational governments for achieving national SDG agendas. However, there is little

deeper analysis of the required nexus between fiscal political and legal arrangements for SNGs their involvement in national policy arenas which discuss and decide on national SDG strategies and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses The text will be of interest to policymakers scholars students and practitioners in public policy and public administration decentralization and sustainable development with a focus on the Asia and Pacific region The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivative License CC BY NC ND 3 0 IGO

Fees Must Fall Susan Booysen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness

politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt **Becoming a Nurse** Derek Sellman,Paul

IntraWEB, LLC,2013-10-01 49 CFR Transportation Narrowing the Channel Robert Gulotty,2020-04-24 While large multinational corporations have supported the removal of tariffs behind the scenes these firms have fought for protection in the form of product regulations including testing labeling and registration requirements Unlike tariffs these regulations can raise fixed costs excluding smaller firms from the market and shifting profits toward global giants Narrowing the Channel demonstrates that globalization and globalized firms can paradoxically hinder rather than foster economic cooperation as larger firms seek to protect their markets through often unnecessarily strict product regulations To illustrate the problem of regulatory protectionism Robert Gulotty offers an in depth analysis of contemporary rulemaking in the United States and the

European Union in the areas of health safety and environmental standards He shows how large firms seek regulatory schemes that disproportionately disadvantage small firms When multinationals are embedded in the local economy governments too have an incentive to use these regulations to shift profits back home Today the key challenge to governing global trade is not how much trade occurs but who is allowed to participate and this book shows that new rules will be needed to allow governments to widen the benefits of global commerce and avoid further inequality and market concentration
