1. Translate into English:*Encounter in the rain.*

Nous étions un dimanche. Il était six heures du soir. La rue s'était changée en torrent. Mon violon sous le bras, j'attendais, devant la porte d'entrée, la fin de l'orage.

Quelqu'un vint se poster à mes côtés, mais je ne pris pas garde à lui. Comme moi, sans doute, il s'impatientait de toute cette obscurité et de toute cette pluie.

Peu à peu il cessait de pleuvoir. Je n'entendis enfin que le bruit, presque imperceptible, que faisaient les gouttes en tombant une à une du toit. Une voix! Qui donc me parlait?

Cela paraissait provenir de si loin, tout à fait comme dans un songe. Je me retournai brusquement et je reconnus le visage étrange que j'avais vu tout à l'heure. "Je voudrais parler de musique un peu . . ."

O Level French Paper November 2009:

The French White Paper on Defence and National Security France. Commission du Livre blanc sur la défense et la sécurité nationale, 2008-07-15 The French White Paper on Defence and National Security sets forth a detailed roadmap for defending the nation's territory and security interests in a globalised world. It also describes how France can contribute to a wider and more effective role for Europe on the international scene. Upon being elected President of the French Republic, Nicolas Sarkozy appointed a wide-ranging Commission to appraise France's defence and security strategy. The resulting White Paper surveys today's uncertain world and addresses key questions in the field of international security. It embraces European developments, the transatlantic partnership, the evolution of the United Nations and the changing position of the Western world and its relations with the Asian and African powers. It tackles key changes in French defence and security policy in the coming years and the essential role of knowledge-based security and intelligence gathering, nuclear deterrence, the protection of citizens as well as of French and European territory and future operations abroad. The book considers questions that lie at the heart of modern military and political strategy. Issues dealt with include Jihadist inspired terrorism, proliferation of ballistic missiles, preparing for massive cyber attacks, the future shapes of warfare and the tools for building peace that globalisation affords. This White Paper will interest everyone concerned about international security and the role of citizens in contributing to their own security.

The Power of Deliberation Ian Johnstone, 2011 Arguing about matters of public policy is ubiquitous in democracies. The ability to resolve conflicts through peaceful contestation is a measure of any well-ordered society. This book challenges the assumption that arguing is mere lip service with no real impact on the behavior of states or the structure of the international system.

Disaggregated Impacts of CAP Reforms: Proceedings of an OECD Workshop OECD, 2011-02-08 This report collects papers presented at the OECD Workshop on Disaggregated Impacts of CAP Reforms held in Paris in 2010, which focused on recent reforms. In particular, it examined the implementation of the single payment scheme since 2005 and the transfer of

funds between different measures *The Protection of Working Relationships* Frans Pennings, Claire Bosse, 2011-01-01 In recent years it has become clear that many businesses motivated by avoiding the rigidity and the price tag associated with labour law and social security have succeeded in eroding the protection of labour law by creating numerous categories of workers classified as non employees In 1996 the International Labour Organisation ILO adopted Recommendation 198 which asks its Members to undertake action to reduce disguised employment relationships with the goal of ensuring that those actually working in an employment relationship are actually given the corresponding legal status Though these are from a legal approach two conceptually different phenomena they are closely related from a social policy point of view In order to make a substantial contribution to the discussion on these developments a group of noted European labour law scholars has undertaken the research assembled in this book recommending labour law reforms based on a close examination of existing conditions The eight authors analyse measures and legal instruments offered by the European Union and the ILO to cover persons performing personal work as well as specific developments in Belgium France The Netherlands Poland Germany and the United Kingdom In each case they describe viable ways in which categories of persons not treated as employees can be brought under the protection of labour law and how the distinction between employees and self employed can become more clear In a concluding final Chapter comparative conclusions are drawn on the basis of this study and recommendations are given to the EU the ILO and the individual Member States Among the specific issues covered are the following redefining the subordination criterion the role of the courts determination of the contract of employment forms of labour involving more than two contracting parties e g employment agency arrangements the legal position of temporary workers employee like persons e g home workers or commercial representatives the bogus self employed introduction and effect of legal presumptions in labour law and or social security developing uniform criteria for the employment relationship criteria for identifying self employed but economically dependent workers extension of protection of labour law to persons other than employees or the self employed and social rights applicable to all work contracts irrespective of their formal qualification floor of core rights This study seriously contributes toward overcoming the reluctant and piecemeal measures commonly taken to extend the protection of the employment contract Although the authors acknowledge the continuing tension between labour law protection and the need for a flexible workforce they also recognize the positive effects of best practices that lead to more certainty fewer disputes and clear but still flexible if necessary agreements The book will be warmly welcomed as a signal contribution to addressing what one labour law scholar has called the most important industrial relations issue of our time With, Without, or Against the State? Michaël Tatham, 2016-06-23 Much research has highlighted that sub state entities SSEs such as the German L nder the Spanish autonomous communities or the French regions mobilise at the European level This literature however is silent on how this sub state activity interacts with that of its own member state Do SSEs lobby in Brussels with their member state cooperation without their member state non

interaction or against their member state conflict This book fills the current research gap by identifying what pattern of interaction between state and sub state EU interest representation corresponds to and by identifying what the determinants of such a pattern are To achieve this both quantitative and qualitative methods are employed The quantitative section consists of regression analysis on data collected through a survey addressed to heads of regional offices in Brussels and highlights that cooperation is the most frequent outcome followed by non interaction Conflicting interest representation is the least frequent outcome Further analysis reveals that devolution levels do not affect conflict but increase the frequency of cooperation and decrease that of non interaction Meanwhile party political incongruence fails to affect conflict decreases cooperation and increases non interaction This quantitative work is complemented by a series of in depth case study analyses of Scotland UK Salzburg Austria Rh ne Alpes and Alsace both France Based on over a hundred semi structured interviews the case studies along with additional statistical testing confirm the overall findings reached through quantitative means and further suggest that the effect of devolution overrides that of party political incongruence Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

to explain a larger national narrative Melding on the ground reports with a deep knowledge of history French exposes the cultural foundations of India's political economic and social complexities He reveals how a nation identified with some of the most wretched poverty on earth has simultaneously developed an envied culture of entrepreneurship here are stories like that of C K Ranganathan who trudged the streets of Cuddalore in the 1980s selling sample packets of shampoo and now employs more than one thousand people And even more remarkably French shows how despite the ancient and persistent traditions of caste as well as a mind boggling number of ethnicities and languages India has nevertheless managed to cohere evolving into the world's largest democracy largely fulfilling Jawaharlal Nehru's dream of a secular liberal order French's inquiry goes to the heart of all the puzzlements that modern India presents Is this country actually rich or poor Why has its Muslim population the second largest on earth resisted radicalization to such a considerable extent Why do so many children of Indians who have succeeded in the West want to return home despite never having lived in India Will India become a natural ally of the West a geostrategic counterweight to the illiberal rising powers China and Russia To find the answers French seeks out an astonishing range of characters from Maoist revolutionaries to Mafia dons from chained quarry laborers to self-made billionaires And he delves into the personal lives of the political elite including the Italian born Sonia Gandhi one of the most powerful women in the world With a familiarity and insight few Westerners could approach Patrick French provides a vital corrective to the many outdated notions about a uniquely dynamic and consequential nation His India is a thrilling revelation

Urban Planning and Public Health in Africa Ambe J. Njoh, 2016-02-11 Established indicators of development suggest that as a group African countries lag behind their counterparts in other regions with respect to public health Particularly noteworthy is the fact that the public health problems of these countries are rooted in preventable causes associated with hygiene and sanitation It is customary to attribute the problems that ail Africa to the lack of financial resources This book deviates from convention by suggesting non financial factors as the source of sanitation problems on the continent and argues the need to re connect urban planning to public health These two professions are consanguine relatives and emerged to combat the negative externalities of the industrial revolution and concomitant urbanization However with the passage of time the professions drifted apart Today more than ever there is a need for the two to be re connected This need is rooted in the increasing complexity of urban problems whose resolution requires interdisciplinary initiatives To this end there is hardly any question that urban public health initiatives are unlikely to succeed without the collaboration of both public health and urban planning experts The book recognizes this truism and stands as the first major academic work to demonstrate the inextricably intertwined nature of urban planning and urban public health in Africa

Security and Privacy Joseph Savirimuthu, 2016-12-05 During the last decade in particular the levels of critical engagement with the challenges posed for privacy by the new technologies have been on the rise Many scholars have continued to explore the big themes in a manner which typifies the complex interplay between privacy identity security and surveillance This level of

engagement is both welcome and timely particularly in a climate of growing public mistrust of State surveillance activities and business predisposition to monetize information relating to the online activities of users This volume is informed by the range of discussions currently conducted at scholarly and policy levels The essays illustrate the value of viewing privacy concerns not only in terms of the means by which information is communicated but also in terms of the political processes that are inevitably engaged and the institutional regulatory and cultural contexts within which meanings regarding identity and security are constituted

Collective

Bargaining Developments in Times of Crisis Sylvaine Laulom, 2016-04-24 In many EU Member States the various economic crises of recent years provided grounds for a rarely equalled level of state intervention in the regulation of labour relations with an explicit aim the decentralisation of collective bargaining An extensive body of research summed up and analysed expertly in the chapters of this very important book reveals that the process of decentralisation has more often than not led to a situation where salaries and labour conditions are ever more frequently determined by direct negotiations between employer and employees with the State becoming the sole guarantor of employee protection even as it encourages decreasing labour costs to ensure that companies remain competitive The comparative approach offered in this book adds to this synthesis by providing examples of specific recent developments in fourteen Member States and Turkey Among the numerous topics and issues that arise are the following opt out clauses that derogate unfavourably from sectoral agreement standards extension of the employer's unilateral decision making power memoranda of understanding imposed by the troika EU ECB and IMF and stand by arrangements imposed by the IMF However notwithstanding the strong emphasis on changing the structure of collective agreements by shifting the centre of gravity closer to the company research finds promise in the reconstituted support for sector level agreements increasingly found among very small businesses networked businesses and work via digital platforms This is the first book to take stock of the current state of collective bargaining in Europe It is an essential study for labour and employment law practitioners and an exemplary analysis of immeasurable value to policymakers and academics in the field
