

April 20, 2016,

Mike Thompson, President  
Never Forgotten Honor Flight  
P. O. Box 5056  
Wausau, WI 54402-5056

Dear Mike,

Thank you for the opportunity and the awesome experience my wife and I had, as part of the "Never Forgotten Honor Flight". Your organization is the best, as were all of the people who were involved. I had a wonderful day with my Guardian, Dennis Poppe, and his father, who he also was the Guardian for. It was an exhilarating and enjoyable time beginning with registration and all the way to returning to Central Wisconsin Airport.

We can't thank you and all your wonderful people enough, but we are so humbled by the experience and grateful for the opportunity that we are enclosing a check, so that we might help some other deserving Veteran have an "experience of a lifetime", as I did.

Thanks again from the bottom of our hearts. God Bless You and your work with the "Never Forgotten Honor Flight", and God Bless the USA.

Sincerely,

   
Don and Donna Pagenkopf

Public Statements of Donald H. Rumsfeld, Secretary of Defense, 2001 Donald Rumsfeld, 2001      **Quest for Flight** Gary B. Fogel, Craig S. Harwood, 2012-10-11 The Wright brothers have long received the lion s share of credit for inventing the airplane But a California scientist succeeded in flying gliders twenty years before the Wright s powered flights at Kitty Hawk in 1903 Quest for Flight reveals the amazing accomplishments of John J Montgomery a prolific inventor who piloted the glider he designed in 1883 in the first controlled flights of a heavier than air craft in the Western Hemisphere Re examining

the history of American aviation Craig S Harwood and Gary B Fogel present the story of human efforts to take to the skies They show that history s nearly exclusive focus on two brothers resulted from a lengthy public campaign the Wrights waged to profit from their aeroplane patent and create a monopoly in aviation Countering the aspersions cast on Montgomery and his work Harwood and Fogel build a solidly documented case for Montgomery s pioneering role in aeronautical innovation As a scientist researching the laws of flight Montgomery invented basic methods of aircraft control and stability refined his theories in aerodynamics over decades of research and brought widespread attention to aviation by staging public demonstrations of his gliders After his first flights near San Diego in the 1880s his pursuit continued through a series of glider designs These experiments culminated in 1905 with controlled flights in Northern California using tandem wing Montgomery gliders launched from balloons These flights reached the highest altitudes yet attained demonstrated the effectiveness of Montgomery s designs and helped change society s attitude toward what was considered the impossible art of aerial navigation Inventors and aviators working west of the Mississippi at the turn of the twentieth century have not received the recognition they deserve Harwood and Fogel place Montgomery s story and his exploits in the broader context of western aviation and science shedding new light on the reasons that California was the epicenter of the American aviation industry from the very beginning
