1. Fill in the blank below.

An object in motion will stay in motion, unless it is acted on by some other object, will stay at rest unless acted on by a force. Newton

2. Newton's second law is nothing more than a fancy word for the relationship between force and acceleration. If a car starts from rest and accelerates at 10 m/s², how fast will it be going after 5 seconds?

50 m/s. Since the car starts at rest, multiply 10 m/s² by 5 seconds, and you're done.

3. In a tug-of-war, if both teams pull with the same force, what happens? Nothing happens. If the teams pull with different forces, the team pulling with the greater force wins. (This is Newton's first law.)

4. If a car is moving at a constant speed, what happens if you double the force applied to it? It speeds up.

5. If a car is moving at a constant speed, what happens if you double the mass of the car? It slows down.

6. If a car is moving at a constant speed, what happens if you double both the force and the mass? Nothing happens. The force and mass cancel each other out.

7. If a car is moving at a constant speed, what happens if you double the force and the mass of the car? Nothing happens.

8. If a car is moving at a constant speed, what happens if you double the force and the mass of the car? Nothing happens.
