Peterson, 2023-10-24 *Political Dreams and Musical Themes in the 1848-1922 Formation of Czechoslovakia* Interaction of National and Global Forces characterizes the 1848-1922 formation of Czechoslovakia as a consequence of political and musical expressions Nationalist expressions and formations were striking after the 1848 Revolution The authors explore how the music of Smetana Jan cek and Dvor k inspired people with reminders about the important achievements of past Bohemian leaders Under the control of the Vienna based Habsburg Empire Czech leaders also achieved more political representation in both Habsburg and Bohemian legislatures and Slovaks made some national progress in at least asserting their demands to Budapest and its controlling Magyar Empire During the early twentieth century there was additional pressure to link up these nationalist movements in both music and politics with regional modernist approaches that were increasingly popular in other parts of Europe The outbreak of World War I in 1914 opened up opportunities such as joint participation in the Czechoslovak Legion for the two key ethnic groups to forge a Czechoslovak state Independence took place with considerable western support on October 28 1918 and the commemorative concert two days later of compositions by Josef Suk put the final stamp on a considerable achievement that bore the hallmarks of globalism as well as nationalism **An Introduction to World Politics** Richard Oliver Collin, Pamela L. American Book Publishing Record, 2005 Revolution and the Millennium James F. Rinehart, 1997-10-30 An interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies China Mexico and Iran that were profoundly impinged upon by European and American imperialism The study explores the role of apocalyptic beliefs in radical movements bent on sociopolitical transformation It concludes that millennial expectations performed important and similar preparatory leadership and therapeutic functions in each case Millenarian movements are powerful and emotional social movements that

expect an immediate collective total this worldly supernatural salvation and transformation of society They anticipate the complete destruction of the existing sociopolitical and economic order which they assert will be followed by a new and perfect society This study provides an interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies that were profoundly impinged upon by European and American imperialism It seeks to explore the functional role of millenarianism in these three revolutions In all three cases millenarianism prepared the way for revolutionary transformation It acted as a catalyst for action among that group of the most ardent revolutionists who were willing to pay any price to achieve what they were convinced was the inevitable goal of a utopian society Millenarianism created the potential for charismatic leadership to emerge It functioned as a doctrinal platform that awaited the opportunity to elevate a prophetic revolutionary leader to take control Finally millenarianism performed a therapeutic identity and cathartic function by providing the doctrinal foundation and an effective organization for a social healing process to take place A challenge to conventional arguments on the origins and outcomes of revolutions this study will be of great interest to scholars and researchers in comparative politics sociology and religion **American Political Ideologies** Brian R.

Farmer,2014-11-01 For many people the world of politics is defined by ideologies The average voter rarely takes time to research a policy issue thoroughly relying instead on a set of beliefs set forth by his or her chosen political organization to make important decisions These publicly promoted ideologies play an important role in international as well as domestic political development yet many adherents to a particular belief may have a poor understanding of competing ideologies From right wing to the far left this text dissects eight prominent political ideologies traditional conservatism classic liberalism libertarianism conservative extremism contemporary liberalism communism dependency theory and Islamism In plain terms it describes the basic doctrine and inherent contradictions of each creed along with its particular relevance to today's political landscape An in depth discussion of the political socialization processes that form and perpetuate ideologies is also included Instructors considering this book for use in a course may request an examination copy here [Ideology in](#)
