The towers are lit from within, casting a warm yellow glow. The central tower is slightly behind the other two, creating a sense of depth.

Pluralism Crawford Young, 1979 **Culture, Conflict and the Military in Colonial South Asia** Kaushik Roy, Gavin Rand, 2017-08-25 This book offers diverse and original perspectives on South Asia's imperial military history. Unlike prevailing studies, the chapters in the volume emphasize both the vital role of culture in framing imperial military practice and the multiple cultural effects of colonial military service and engagements. The volume spans from the early East India Company period through to the Second World War and India's independence, exploring themes such as the military in the field and at leisure, as well as examining the effects of imperial deployments in South Asia and across the British Empire. Drawing extensively on new archival research, the book integrates previously disparate accounts of imperial military history and raises new questions about culture and operational practice in the colonial Indian Army. This work will be of interest to scholars and researchers of modern South Asian history, war and strategic studies, military history, the British Empire, as well as politics and international relations.

Bringing Culture Back In Michael Böss, 2015-09-30 Economists used to claim that material self-interest and the rational choices of the individual were universal factors that transcended cultural values and differences. This position has been challenged by critics who have pointed out the methodological and philosophical weaknesses of this approach. They dispute the idea that social order can be explained as the product of the choices of individual agents and that social agents operate independently of their social and cultural values and norms. Today there is virtual agreement not only among students of culture but also among social scientists that culture counts in both politics and society as well as in international relations. In this book, a number of international political scientists, economists, philosophers, and humanist scholars address the role of culture, ethnicity, and religion in contemporary states and societies.
