

## Lab: Population Ecology Graphs

### ECOLOGY

**Introduction:** The ability to interpret graphs and tables is a necessary skill in science but also finds use in everyday life. In articles or textbooks you are likely to find graphs and tables. Understanding the article's message depends heavily on being able to interpret many different types of graphs and tables. In science tables are used to provide information. Frequently one quantity in a table depends upon or is related to another. Data from tables can be graphed to aid interpretation. Graphs give a visual representation of the data that helps to reveal regularities and patterns.

**Procedure:** Answer the following questions regarding the graphs below.

**I. Bacteria** reproduce by splitting in half. It takes about 20 minutes, under ideal conditions, for a bacteria population to double.

#### Analysis Questions

1. Describe what is happening to the population of bacteria.
2. Is the rate of population growth constant or variable?
3. What do we call this type of growth?

**II. White pine** became extinct in northern Minnesota during the last period of glaciation, although it remained in southern climates such as Virginia. Once the glaciers began to retreat, the white pine began to expand northward again; it reappeared in northern Minnesota about 9400 years ago, this is time 0 in the graph

*Biology Terminology (Speedy Study Guides)* Speedy Publishing, 2015-01-29 A biology terminology study guide will help one understand the technical language used in any field related to biology. It also allows one to understand the basic building blocks of the Greek and Latin used within all scientific fields. This will help one understand even unfamiliar words within biology and any other related field of science. Introductory Biological Statistics John E. Havel, Raymond E. Hampton, Scott J. Meiners, 2019-04-30 A thorough understanding of biology no matter which subfield requires a thorough understanding of statistics. As in previous editions, Havel and Hampton with new co-author Scott Meiners ground students in all essential methods of descriptive and inferential statistics using examples from different biological sciences. The authors have retained the readable, accessible writing style popular with both students and instructors. Pedagogical improvements new to this edition include concept checks in all chapters to assist students in active learning and code samples showing how to solve many of the book's examples using R. Each chapter features numerous practice and homework exercises with larger data sets available for download at waveland.com. **Handbook of Environmental and Ecological Statistics** Alan E. Gelfand, Montserrat Fuentes, Jennifer A. Hoeting, Richard Lyttleton Smith, 2019-01-15 This handbook focuses on the enormous literature applying statistical methodology and modelling to environmental and ecological processes. The 21st century statistics community has become increasingly interdisciplinary, bringing a large collection of modern tools to all areas of application in environmental processes. In addition, the environmental community has substantially increased its scope of data collection, including observational data, satellite-derived data, and computer model output. The resultant impact in this latter community has been substantial; no longer are simple regression and analysis of variance methods adequate. The contribution of this handbook is to assemble a state-of-the-art view of this interface. Features: An internationally regarded editorial team; A distinguished collection of contributors; A thoroughly contemporary treatment of a substantial interdisciplinary interface. Written to engage both statisticians as well as quantitative environmental researchers. 34 chapters covering methodology, ecological processes, environmental exposure, and statistical methods in climate science. *High School Biology: The laboratory (Teachers' guide)* Biological Sciences Curriculum Study, 1961. **Resources in Education**, 1998. **Teacher's Wraparound Edition: Two Biology Everyday Experience** Albert Kaskel, 1994-04-19. **Handbook of Population** Dudley L. Poston, Michael Micklin, 2006-04-26 This comprehensive handbook provides an overview and update of the issues, theories, processes, and applications of the social science of population studies. The volume's 30 chapters cover the full range of conceptual, empirical, disciplinary, and applied approaches to the study of demographic phenomena. This book is the first effort to assess the entire field since Hauser and Duncan's 1959 classic *The Study of Population*. The chapter authors are among the leading contributors to demographic scholarship over the past four decades. They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research. Readers' Guide to Periodical Literature

**Undergraduate Mathematics for the Life Sciences** Glenn Ledder, Jenna P. Carpenter, Timothy D. Comar, 2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see *Research in Education*, 1974
