Landy,Jeffrey M. Conte,2010 The workplace in the 21st century is technological and multi cultural Work is often accomplished in teams This work provides students with an up to date knowledge based that will enable them to apply the principles of I O psychology to themselves supervisors subordinates and fellow workers Race, Liberalism, and Economics David Colander,Robert E. Prasch,Falguni A. Sheth,2009-12-14 Explores how economic reasoning relates to the broader concepts of liberalism and racism **The Case against Education** Bryan Caplan,2018-01-30 Why we need to stop wasting public funds on education Despite being immensely popular and immensely lucrative education is grossly overrated In this explosive book Bryan Caplan argues that the primary function of education is not to enhance students skill but to certify their intelligence work ethic and conformity in other words to signal the qualities of a good employee Learn why students hunt for easy As and casually forget most of what they learn after the final exam why decades of growing access to education have not resulted in better jobs for the average worker but instead in runaway credential inflation how employers reward workers for

costly schooling they rarely if ever use and why cutting education spending is the best remedy Caplan draws on the latest social science to show how the labor market values grades over knowledge and why the more education your rivals have the more you need to impress employers He explains why graduation is our society's top conformity signal and why even the most useless degrees can certify employability He advocates two major policy responses The first is educational austerity Government needs to sharply cut education funding to curb this wasteful rat race The second is more vocational education because practical skills are more socially valuable than teaching students how to outshine their peers Romantic notions about education being good for the soul must yield to careful research and common sense The Case against Education points the way

Individual Differences in Children and Adolescents Donald H. Saklofske, Sybil B. G. Eysenck, This uniquely authoritative collection of original papers with contributions from over twenty countries provides a rare insight into research and applied programs in the study of individual differences in children and adolescents worldwide While delinquency proves to be one of the most common areas of interest a wide range of cognitive personality and social characteristics are examined and the use of the Eysenck Personality Questionnaire in many studies allows uniform comparisons to be made between countries The editors have not only overcome the language barriers which hitherto have made such information virtually inaccessible to the English speaking world They have also succeeded in bringing together studies from developed and developing countries East and West to present a global picture of adolescent and child psychology In particular the book highlights the general and specific cultural influences on child development and adolescent psychology in different countries and reflects the social and research concerns of the countries and cultures represented The authors comprise a cross section of professionals in the social and behavioral sciences working in university and clinical settings While North America is well represented by six chapters including Puerto Rico as is Europe particular efforts were made to obtain contributions from Eastern Europe Asia and Africa At the time this book was developed information exchange with eastern European countries was most difficult It is very exciting to present chapters from Hungary Lithuania Romania Russia and Yugoslavia The inclusion of articles from Japan Korea Singapore Sri Lanka and Uganda also add another dimension to studies of individual differences in children Contributions from Australia Israel and New Zealand also allow the book to take on much more of an international perspective on topics ranging from delinquency fears and motivation to intelligence personality and assessment issues This volume provides a plethora of international perspectives on the study of children It will be essential to sociologists psychologists educators and child study specialists Psychology Don H. Hockenbury, Sandra E.
