

The researchers state their initial hypotheses.

Headings and subheadings show the paper's organization.

The experiment's method is described, using the terms and acronyms of the discipline.

Passive voice is used to emphasize the experiment, not the researchers; otherwise, active voice is used.

Therefore, the current study helps us understand how short-term food deprivation affects concentration on and perseverance with a difficult task. Specifically, participants deprived of food for 24 hours were expected to perform worse on a concentration test and a perseverance task than those deprived for 12 hours, who in turn were predicted to perform worse than those who were not deprived of food.

Method

Participants

Participants included 51 undergraduate-student volunteers (32 females, 19 males), some of whom received a small amount of extra credit in a college course. The mean college grade point average (GPA) was 3.19. Potential participants were excluded if they were dieting, menstruating, or taking special medication. Those who were struggling with or had struggled with an eating disorder were excluded, as were potential participants addicted to nicotine or caffeine.

Materials

Concentration speed and accuracy were measured using an online numbers-matching test (www.psychtests.com/tests/iq/concentration.html) that consisted of 26 lines of 25 numbers each. In 6 minutes, participants were required to find pairs of numbers in each line that added up to 10. Scores were calculated as the percentage of correctly identified pairs out of a possible 120. Perseverance was measured with a puzzle that contained five octagons—each of which included a stencil of a specific object (such as an animal or a flower). The octagons were to be placed on top of each other in a specific way to make the silhouette of a rabbit. However, three of the shapes were slightly altered so that the task was impossible. Perseverance scores were calculated as the number of minutes that a participant spent on the puzzle task before giving up.

Procedure

At an initial meeting, participants gave informed consent. Each consent form contained an assigned identification number and requested the participant's GPA. Students were then informed that they would be notified by e-mail and telephone about their assignment to one of the

Writing a Graduate Thesis or Dissertation Lorrie Blair, 2016-02-10 The Teaching Writing series publishes user

friendly writing guides penned by authors with publishing records in their subject matter Blair's practical book gives graduate students the tools they need to successfully plan, write and defend their thesis or dissertation. Each chapter addresses a rite of passage common to most graduate programs: selecting a methodology, conducting a literature search, carrying out research, analyzing data, and preparing for a thesis defense. Combining years of supervisory experience with up-to-date research, Blair addresses issues important to graduate students that are often left out of these guides, including how to navigate the ethics review process and avoid problems related to academic integrity such as plagiarism, how to select and prepare for a productive meeting with a supervisor, and how to establish an academic track record by presenting research at conferences and publishing in academic journals. *Writing a Graduate Thesis or Dissertation* offers much more than its title suggests. It is a thorough and succinct guide to succeeding in graduate school, appropriate for thesis and research methods courses and a must-read for graduate students across the disciplines. Like a series of productive meetings with a trusted advisor, each chapter of this text provides practical information and sound insight, thoughtfully organized and generously shared.

Christine Marm Thompson, Professor of Art Education, School of Visual Arts, Pennsylvania State University. This will become a must-have volume for every graduate student's bookshelf with advice for every step of the thesis journey.

Anne Lavack, Professor of Marketing, School of Business and Economics, Thompson Rivers University. More than simply comprehensive, this work includes information and considerations that are rarely addressed in other guides, including information related to selecting supervisors and alternative forms of research methodologies and format styles.

Adrienne Boulton Funke, Assistant Professor, Art and Design, Missouri State University. Lorrie Blair is a Professor of Art Education at Concordia University in Montreal, Quebec. With over 25 years post-secondary teaching experience, she has held positions at universities in the United States and Canada. She is active as a supervisor of MA and Ph.D. thesis students and was a recent recipient of the Faculty of Fine Arts Distinguished Teaching Award.

Animal Experimentation: Working Towards a Paradigm Change Kathrin Herrmann, Kimberley Jayne, 2019-04-30. Animal experimentation has been one of the most controversial areas of animal use, mainly due to the intentional harms inflicted upon animals for the sake of hoped-for benefits in humans. Despite this rationale for continued animal experimentation, shortcomings of this practice have become increasingly more apparent and well-documented. However, these limitations are not yet widely known or appreciated, and there is a danger that they may simply be ignored. The 51 experts who have contributed to *Animal Experimentation: Working Towards a Paradigm Change* critically review current animal use in science, present new and innovative non-animal approaches to address urgent scientific questions, and offer a roadmap towards an animal-free world of science.

Engaging Undergraduates in Publishable Research: Best Practices Traci A. Giuliano, Jeanine L. M. Skorinko, Marianne Fallon, 2019-11-20. Although many articles and books have been written about conducting research with undergraduates, there is a dearth of research on the process of publishing with undergraduates. Thus, in this research topic, we assembled a

collection of 43 articles from 98 researchers worldwide who are passionate about and have had success in publishing high quality peer reviewed journal articles with undergraduates The diverse articles represent a wide range of practices to help researchers publish with undergraduates including structuring the curriculum to promote undergraduate research and publication optimizing research experiences for undergraduates training students in implementing advanced techniques accessing special populations or conducting research in off campus settings addressing institutional and career challenges for faculty and increasing inclusion and diversity Each article provides a unique and diverse perspective that nevertheless resonates across contexts and situations We hope that the ideas models techniques and practices in these articles will motivate and inspire readers to begin continue or rethink how they engage undergraduates in publishable research we also hope to stimulate empirical and quantitative research on the effectiveness of these ideas models techniques and practices
