Development and Nature of Political Geography The Scope of Political Geography Geopolitics of Uneven Development A Third World Perspective Maritime Boundaries and Territorial Waters Core Areas Ecumene Boundaries and Capitals City Electoral Studies and Physical Elements of Political Geography Methodological Approaches to Political Geography [Will as Commitment and Resolve](#) John J. Davenport,2009-08-25 In contemporary philosophy the will is often regarded as a sheer philosophical fiction In Will as Commitment and Resolve Davenport argues not only that the will is the central power of human agency that makes decisions and forms intentions but also that it includes the capacity to generate new motivation different in structure from prepurposive desires The concept of projective motivation is the central innovation in Davenport s existential account of the everyday notion of striving will Beginning with the contrast between eastern and western attitudes toward assertive willing Davenport traces the lineage of the idea of projective motivation from NeoPlatonic and Christian

conceptions of divine motivation to Scotus Kant Marx Arendt and Levinas Rich with historical detail this book includes an extended examination of Platonic and Aristotelian eudaimonist theories of human motivation Drawing on contemporary critiques of egoism Davenport argues that happiness is primarily a byproduct of activities and pursuits aimed at other agent transcending goods for their own sake In particular the motives in virtues and in the practices as defined by Alasdair MacIntyre are projective rather than eudaimonist This theory is supported by analyses of radical evil accounts of intrinsic motivation in existential psychology and contemporary theories of identity forming commitment in analytic moral psychology Following Viktor Frankl Joseph Raz and others Davenport argues that Harry Frankfurt s conception of caring requires objective values worth caring about which serve as rational grounds for projecting new final ends The argument concludes with a taxonomy of values or goods devotion to which can make life meaningful for us *Government and Policy for U.S. Health Leaders* Raymond J. Higbea, Gregory Cline, 2019-12-02 Written with graduate students in mind this balanced cross disciplinary text explores health policy from all directions theory philosophy ethics history economics analysis etc for a complete and thorough examination of policy today Its unique approach comprehensively explores the health policy process looking at why we are here how we got here and what are the outcomes Beginning with government political philosophy and health policy this comprehensive text moves before on to a thorough examination of international health comparisons political theory and the policy process The book concludes with health policy topical concerns policy outcomes and advocacy Its broad cross disciplinary approach to the health policy process makes this text an ideal well rounded resource for policy courses across the health professions
