Annual Report for Fiscal Year ... National Science Foundation (U.S.), 1963

Proceedings of the Future Technologies Conference (FTC) 2023, Volume 3 Kohei Arai, 2023-11-08 This book is a collection of thoroughly well researched studies presented at the Eighth Future Technologies Conference This annual conference aims to seek submissions from the wide arena of studies like Computing Communication Machine Vision Artificial Intelligence Ambient Intelligence Security and e Learning With an impressive 490 paper submissions FTC emerged as a hybrid event of unparalleled success where visionary minds explored groundbreaking solutions to the most pressing challenges across diverse fields These groundbreaking findings open a window for vital conversation on information technologies in our community especially to foster future collaboration with one another We hope that the readers find this book interesting and

inspiring and render their enthusiastic support toward it Methods in the Philosophy of Science Sophie J Veigl, Adrian Currie, 2025-07-15 A guidebook to methods and methodology encouraging deeper engagement across the philosophy of science and beyond The last twenty years have seen multiple methodological revolutions in the philosophy of science There has been increased diversity concerning the questions asked who asks those questions who the relevant audiences are and what the techniques and tools involved are In Methods in the Philosophy of Science A User s Guide Sophie Veigl and Adrian Currie introduce this range of methods through both practical advice and philosophical reflection Each chapter introduces the reader to a method or set of methods in the philosophy of science discusses its advantages and limitations and provides practical guidance on how to learn skills relevant to applying the method The volume fulfills several critical roles First by introducing and discussing methods in the philosophy of science the collection increases philosophers awareness of methodological options of particular importance for younger scholars who are often not exposed to the diversity of practice Second the collection s practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them Machine Learning and Data Sciences for Financial Markets

Agostino Capponi, Charles-Albert Lehalle, 2023-06-01 Leveraging the research efforts of more than sixty experts in the area this book reviews cutting edge practices in machine learning for financial markets Instead of seeing machine learning as a new field the authors explore the connection between knowledge developed by quantitative finance over the past forty years and techniques generated by the current revolution driven by data sciences and artificial intelligence The text is structured around three main areas Interactions with investors and asset owners which covers robo advisors and price formation Risk intermediation which discusses derivative hedging portfolio construction and machine learning for dynamic optimization and Connections with the real economy which explores nowcasting alternative data and ethics of algorithms Accessible to a wide audience this invaluable resource will allow practitioners to include machine learning driven techniques in their day to day quantitative practices while students will build intuition and come to appreciate the technical tools and motivation for the theory
