*Matrices and Multiplier Analysis* Clemens Breisinger, Marcelle Thomas, James Thurlow, 2009 This training guide introduces development practitioners policy analysts and students to social accounting matrices SAMs and their use in policy analysis There are already a number of books that explain the System of National Accounts and SAM multipliers some of these are recommended at the end of this training guide However most books tend to be quite technical and move quickly from an introduction to more complex applications By contrast this guidebook uses a series of hands on exercises to gradually introduce SAMs and multiplier analysis It therefore complements more theoretical SAM and multiplier literature and

provides a first step for development practitioners and students wishing to understand the strengths and limitations of these economic tools. It is also useful for policy analysts and researchers embarking on more complex SAM based methodologies. One such methodology is computable general equilibrium CGE modeling for which IFPRI has also developed a series of introductory exercises and a standard modeling framework.
