PPI techniques has transposed the boundaries of clinical practice into a wide array of complementary domains such as law education business and even design sciences such as architecture These interventions target the enhancement of positive psychological capacities e g strength identification and use high performance learning appreciative design job crafting in order to not only improve individual functioning well being and the treatment of various forms of psychopathology but also to enhance team functioning performance organizational growth and community development Despite its importance very little research has been done on the design of PPIs applicable to multi cultural contexts The contributions to this volume provide insights into this hitherto neglected area of research
