Anderson, 2021-04-01 How can markets help us adapt to the challenges of climate change Editor Terry L Anderson brings together this collection of essays featuring the work of nine leading policy analysts who argue that market forces are just as important as government regulation in shaping climate policy and should be at the heart of our response to helping societies adapt to climate change Anderson notes in his introduction that most current climate policies such as the Paris Agreement require hard to enforce collective action and focus on reducing or mitigating greenhouse gases rather than adapting to their negative effects Adaptive actions can typically deliver much more faster and more cheaply than any realistic climate policy The authors tackle a range of issues the hidden costs of renewable energy sources the political obstacles surrounding climate change policy insurance and financial instruments for pricing risk of exposure to the effects of climate change and more Reliance on emerging renewable energies and a carbon tax are not enough to prevent the effects of global warming they argue We must encourage more private action and market incentives to adapt to a rapidly changing climate

The Role of the Indian Ocean for Global Peace - Interdisciplinary Issues Dr. (Capt.) Vivek Jain,2023-11-02 This book deals with the various interdisciplinary issues of the Indian Ocean individually and collectively such as its history geography nautical elements economics trade routes old and new blue economy deep sea mining fisheries management tourism scourge of piracy pollution Law of the Sea UNCLOS 1982 and the different

perspectives of its littoral countries on geopolitics international law international relations and maritime partnerships It is the most important ocean in the world 33% of the global population lives in the area and 50 60% of the world s maritime trade transits through it In addition around 60% of global oil and 26% of global gas reserves along with pristine beaches are located here To comprehend the interdisciplinary issues the editor embarked on a voyage to discover persuade and collaborate with exceptionally brilliant influential experts from prominent littoral countries India Indonesia Iran South Africa Malaysia and Singapore with relevant experience to expound the above subject areas In addition geopolitical conflicts hostilities and trade wars are on the rise war seems inevitable but not imminent Any conflict is likely to originate in other oceans and seas but will end up impacting the Indian Ocean s littoral countries Accordingly these countries must comprehend the interdisciplinary issues and the special role of the Indian Ocean to prevent all encompassing wars hostilities from widening at a global level and thereafter must flesh out plans to shield themselves They must also understand the area s role in working towards global peace by comprehending the above interdisciplinary issues The role of the Indian Ocean in global peace can only be achieved through maritime partnerships between its littoral countries and their avoidance of impulses to invite outside power s to balance each other s power However maritime partnerships are easier said than done At the very least the maritime partnership between two major Indian Ocean littoral powers India and Indonesia is critical to shield the region from geopolitical firestorms Hopefully this maritime partnership s tactic of embracing a carrot and stick approach will eventually persuade global powers from outside the Indian Ocean region to improve their conduct to achieve global peace

The Third Pillar Raghuram Rajan,2020-02-25 Revised and updated
Shortlisted for the Financial Times McKinsey Business Book of the Year Award From one of the most important economic thinkers of our time a brilliant and far seeing analysis of the current populist backlash against globalization Raghuram Rajan distinguished University of Chicago professor former IMF chief economist head of India s central bank and author of the 2010 FT Goldman Sachs Book of the Year Fault Lines has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics In The Third Pillar he offers up a magnificent big picture framework for understanding how these three forces the state markets and our communities interact why things begin to break down and how we can find our way back to a more secure and stable plane The third pillar of the title is the community we live in Economists all too often understand their field as the relationship between markets and the state and they leave squishy social issues for other people That s not just myopic Rajan argues it s dangerous All economics is actually socioeconomics all markets are embedded in a web of human relations values and norms As he shows throughout history

technological phase shifts have ripped the market out of those old webs and led to violent backlashes and to what we now call populism Eventually a new equilibrium is reached but it can be ugly and messy especially if done wrong Right now we re doing it wrong As markets scale up the state scales up with it concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose figuratively and even literally Instead Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest Rajan is not a doctrinaire conservative so his ultimate argument that decision making has to be devolved to the grass roots or our democracy will continue to wither is sure to be provocative But even setting aside its solutions The Third Pillar is a masterpiece of explication a book that will be a classic of its kind for its offering of a wise authoritative and humane explanation of the forces that have wrought such a sea change in our lives

Controlling Capital Nicholas Dorn,2016-02-12 Controlling Capital examines three pressing issues in financial market regulation the contested status of public regulation the emergence of culture as a proposed modality of market governance and the renewed ascendancy of private regulation In the years immediately following the outbreak of crisis in financial markets public regulation seemed almost to be attaining a position of command the robustness and durability of which is explored here in respect of market conduct European Union capital markets union and US and EU competition policies Subsequently there has been a softening of command and a return to public private co regulation positioned within a narrative on culture The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects stakeholder connivance and wider political embeddedness Lastly the book looks from both appreciative and critical perspectives at private regulation through financial market associations arbitration of disputes and most controversially market policing by hedge funds Bringing together a distinguished group of international experts this book will be a key text for all those concerned with issues arising at the intersection of financial markets law culture and governance

Presidents, Populism, and the Crisis of Democracy William G. Howell,Terry M. Moe,2020-07-14 To counter the threat America faces two political scientists offer clear constitutional solutions that break sharply with the conventional wisdom Steven Levitsky New York Times bestselling coauthor of How Democracies Die Has American democracy s long ambitious run come to an end Possibly yes As William G Howell and Terry M Moe argue in this trenchant new analysis of modern politics the United States faces a historic crisis that threatens our system of self government and if democracy is to be saved the causes of the crisis must be understood and defused The most visible cause is Donald Trump who has used his presidency to attack the nation s institutions and violate its democratic norms Yet Trump is but a symptom of causes that run much deeper social forces like globalization automation and immigration that for decades have generated economic harms and cultural anxieties that our government has been wholly ineffective at addressing Millions of Americans have grown angry and disaffected and populist appeals have found a receptive audience These were the drivers of Trump s

dangerous presidency and they're still there for other populists to weaponize. What can be done? The disruptive forces of modernity cannot be stopped. The solution lies instead in having a government that can deal with them, which calls for aggressive new policies but also for institutional reforms that enhance its capacity for effective action. The path to progress is filled with political obstacles, including an increasingly populist anti-government Republican Party. It is hard to be optimistic. But if the challenge is to be met, we need reforms of the presidency itself: reforms that harness the promise of presidential power for effective government but firmly protect against that power being put to anti-democratic ends.

Moving the AEC Beyond 2015 Tham Siew Yean, 2018-02-14

The ten Southeast Asian economies reached a milestone on 31 December 2015 when they announced the formation of an ASEAN Community. Although this includes three pillars: ASEAN Political Security Community, ASEAN Economic Community (AEC), and the ASEAN Socio-Cultural Community, it is the economic pillar that generates immense debate due to its expected quantifiable benefits to member countries. This book thus focuses on the ASEAN Economic Community and seeks to explain the need for building domestic consensus within the member countries. It starts with an overview chapter describing the current achievements of the AEC. It then explores possible explanations for the achievements, non-achievements, and offers a hypothesis on conflicting economic interests in a country as one possible explanation for gaps in implementation. This is because any form of economic liberalisation brings with it the winners and losers, thereby raising resistance to liberalization measures and slowing down the implementation process. The book includes six country chapters: Indonesia, Malaysia, the Philippines, Singapore, Thailand, and Vietnam, that examine sources of domestic conflicts in greater detail and depth. It also includes a regional chapter co-authored by the ex-Secretary General of ASEAN, Mr. Rodolfo Severino, that brings out the political nature of ASEAN economic cooperation since its inception in 1976. For ASEAN beyond 2015, the book articulates the need to obtain a strong domestic consensus that supports the integration initiatives of the AEC. This can be viewed as a way forward to accelerate and deepen integration within ASEAN. The book concludes with some suggestions on how each country can move towards achieving domestic consensus based on the respective country-level analysis.
