GCSE Mathematics - A Pocket Guide for Re-takers and Adults Mick Price, 2024-05-24 As its title suggests this book has been devised by author Mick Price as an essential guide for those revisiting Mathematics at GCSE level. Crafted from years of experience and class tested materials it serves as a unique revision tool tailored for both FE college students and adults seeking to improve their previous grades or refresh long forgotten knowledge. Stripping back the complexities of mathematics this book focuses on the fundamentals needed to achieve a grade 4 without overwhelming its readers with the entirety of KS4 content. GCSE Mathematics promises accessibility and convenience making it an indispensable companion for both classroom learning and self study. Inside you will find a blend of theoretical essentials, practical real life examples and exercises designed for both younger and more mature learners all presented in a straightforward uncondescending manner. GCSE Mathematics is not just a book it is a tool for success always within reach.

Corporate DNA Arnold Kransdorff, 2017-05-15 For more than half a century the developed world has been chasing productivity. It has financed our wealth but that part of output on which our continued prosperity depends productivity growth is petering out. The traditional scapegoat has been the dearth of worker skills. But the worker skills base has never been higher. The other explanation is that it is managers who are not giving full value to their employers. The way they are making decisions is conferring virtually no upside potential which means they are leaving us wide open for experience poor competitors to step into our experience rich shoes. Exactly as Japan did in the 1960s and the so called BRICK countries Brazil Russia India China especially China and Korea are threatening now. If creeping uncompetitiveness is not to overtake us from where are the next round of productivity gains to come from? Identifying some gaping holes in the way managers are taught to manage this book outlines both the size of the problem and a solution. Businesses and other organizations the author says have to substantially raise the quality of their decision making. For this to happen they need to be much better experiential learners. And for experiential learning to take place companies and other institutions have to better manage their corporate DNA the institution specific experiences otherwise known as Organizational Memory OM which characterizes any organization's ability to perform is the single biggest influence on decision making excellence. It is a factor of production that has already been paid for at great expense yet is readily discarded in the backwash of the biggest change in workplace practice for more than a century the actively encouraged flexible labour market. Corporate DNA explains why this key component of intellectual capital should be better managed can be better managed and particularly how it can be used to help organizations reduce the pandemic of repeated mistakes.

Education under Siege Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country's economic success recent UK governments have insisted their reforms are the only way to make England's system world class. Yet pupils are tested rather than educated teachers bullied rather than trusted and parents cast as winners or losers in a gamble for school places.

Education under siege considers the English education system as it is and as it might be In a highly accessible style Peter Mortimore an author with wide experience of the education sector both in the UK and abroad identifies the current system s strengths and weaknesses He concludes that England has some of the best teachers in the world but one of the most muddled systems Challenging the government s view that there is no alternative he proposes radical changes to help all schools become good schools They include a system of schools receiving a fair balance of pupils who learn easily and those who do not ensuring a more even spread of effective teachers as well as banning league tables outlawing selection opening up faith schools and integrating private schools into the state system In the final chapter he asks readers who share his concerns to demand that the politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the future education of our children *OCR GCSE Maths 9-1 GCSE Revisions*,2019-04-11
