November 2014 Agriculture Paper :

Agricultural Policy Monitoring and Evaluation 2015 OECD, 2015-08-14 This annual publication provides information on policy developments and related support to agriculture in OECD countries and selected partner economies measured with the OECD Producer Support Estimate methodology

Agricultural Systems: Agroecology and Rural Innovation for Development Sieglinde Snapp, Barry Pound, 2017-02-17 *Agricultural Systems* Second Edition is a comprehensive text for developing sustainable farming systems. It presents a synthetic overview of the emerging area of agroecology applications to transforming farming systems and supporting rural innovation with particular emphasis on how research can be harnessed for sustainable agriculture. The inclusion of research theory and examples using the principles of cropping system design allows students to gain a unique understanding of the technical, biological, ecological, economic, and sociological aspects of farming systems science for rural livelihoods. This book explores topics such as re-inventing farming systems principles and practice of agroecology, agricultural change and low input technology, ecologically based nutrient management, participatory breeding for developing improved and relevant crops, participatory livestock research for development, gender and agrarian inequality at the local scale, the nature of agricultural innovation and outreach to support rural innovation. The extensive coverage of subjects is complemented with integrated references and a companion website making this book essential reading for courses in international agricultural systems and management, sustainable agricultural management and cropping systems. This book will be a valuable resource for students of agricultural science, environmental engineering and rural planning, researchers and scientists in agricultural development agencies and practitioners of agricultural development in government extension programs, development agencies and NGOs. Provides students with an enhanced understanding of how research can be harnessed for sustainable agriculture. Incorporates social, biological, chemical, and geographical aspects important to agroecology. Addresses social and development issues related to farming systems.

Food Security

Governance Nora McKeon, 2014-12-17 This book fills a gap in the literature by setting food security in the context of evolving global food governance. Today's food system generates hunger alongside of food waste, burgeoning health problems, massive greenhouse gas emissions. Applying food system analysis to review how the international community has addressed food issues since World War II, this book proceeds to explain how actors link up in corporate global food chains and in the local food systems that feed most of the world's population. It unpacks relevant paradigms from productivism to food sovereignty and highlights the significance of adopting a rights-based approach to solving food problems. The author describes how communities around the world are protecting their access to resources and building better ways of producing and accessing food and discusses the reformed Committee on World Food Security, a uniquely inclusive global policy forum and how it could be supportive of efforts from the base. The book concludes by identifying terrains on which work is needed to adapt the practice of the democratic public sphere and accountable governance to a global dimension and extend its

authority to the world of markets and corporations This book will be of interest to students of food security global governance development studies and critical security studies in general *OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Turkey* OECD,2016-09-26 Productivity growth in the Turkish agricultural sector is supported today by better technologies crop varieties and animal breeds Yet improvements have slowed since the late 2000s and the productivity gap between agriculture and the rest of the economy remains large **State of the World 2015** The Worldwatch Institute,2015-04-13 We think we understand environmental damage pollution water scarcity a warming world But these problems are just the tip of the iceberg Food insecurity financial assets drained of value and a rapid rise in diseases of animal origin are among the underreported consequences of an unsustainable global system In this volume experts explore these hidden threats along with the central question of how we can develop resilience to these and other shocks *THE CLIMATE PHENOMENON* Patrick K.
